

Assembly Sheet - Contract Filled or Overfilled

Last Modified on 01/09/2023 1:28 pm CST

Q. How do I know when a Contract has been filled or overfilled on an Assembly Sheet?

A. Assembly Sheet - Contract Filled

<Cust ID>	Name	Split %	<Contract>	DPR	Share Units	Settled Units	Share Left	Charge ID
1 BarJas	Jason Barnes	100.0000	2	Priced	2000.00	0.00	2000.00	None
2 BarJas	Jason Barnes	0.0000	3	Priced	4000.00	0.00	4000.00	None

When a contract is filled, the contract will appear blue on the assembly sheet. When a contract is filled on a split line and another contract is applied to the share left, the contract and the share left appears on a new split line. If the contract is not yet filled, the contract number will appear in black.

Note: The program does not automatically go back and update scale tickets with the contract price, but the contract price is used on the settlement. If a ticket overfills a contract and a non-contract entry is created with a priced disposition, the price entered will not be updated as the base price on the scale ticket. The user can edit the scale ticket or use a utility called "Update the Scale Ticket Information" to update the price on the scale ticket. Refer to the following document:

Update Scale Ticket Information

Edit an Assembly Sheet

General Shrink, Dock & Premium Discount Comments

Assembly # 3 Gross Units 6000.00 Percent Dock/Shrink 0.00 Crop Season

Location Main Dockage/Shrink 0.00 Unavailable <Farm ID>

<Commodity> Corn ? Net Units 6000.00 Calculate Averages <Field ID>

Date Established 01/02/2007 Default Price 3.1000 Assign Grade Factor Result Lot Number

Freight Charges

Customer Information

Unsettle Assembly Split Clear Splits to Share Units ReBuild

	<Cust ID>	Name	Split %	<Contract>	DPR	Share Units	Settled Units	Share Left	Charge ID
1	BarJas	Jason Barnes	100.0000	2	Priced	2000.00	0.00	2000.00	None
2	BarJas	Jason Barnes	0.0000		Priced	4000.00	0.00	4000.00	None

Print Assembly on Save Save Cancel

When the contract has been filled and a non-contract entry is created, the contract data field will be blank on the new assembly split line.
