Recalculating Scale Tickets

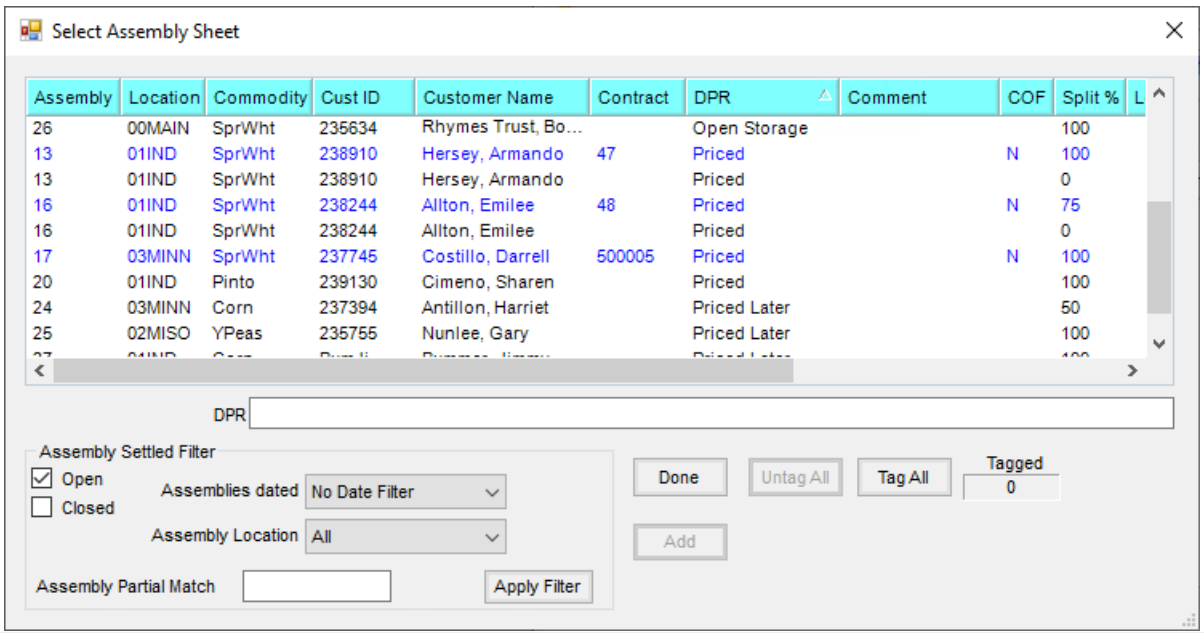

Last Modified on 10/28/2026 7:41 am CDT

When a Premium/Discount table that has been applied to an Assembly Sheet has been modified or changed, this process should be used to reflect the modifications or changes on related Scale Tickets.

1. To recalculate Scale Tickets, go to *Grain / Utilities / Recalculate Premium/Discount on Scale Tickets.*

2. Double-click the *Assembly* column heading.
3. Select the Assembly or Assemblies needing the Scale Tickets recalculated. Choose **Done** when all are selected.

4. Select **Continue** to recalculate.
