Attachment Editor

Last Modified on 10/25/2024 1:12 pm CDT

Add shapes, lines, and dimensions to an existing map. Select **Close** to close the Attachment Editor and remove it from the Mapping toolbar.

	Save – Save any mapping changes.
	Undo – Undo the last change up to the most recent save.
	Add Text – Add a text attachment anywhere in the *Mapping* window.
	Add a Polygon – Add a freeform or free-drawn polygon attachment.
	Add a Line – Add a line attachment.
	Add a Rectangle – Add a rectangle attachment.
	Add a Circle – Add a circle attachment.
	Add an Ellipse – Add an ellipse attachment.
	Add a Dimension – Add a dimension attachment. This line only appears when *Dimensions* is toggled *On* from the Mapping pane toolbar.
	Add a Location – Add a lon/lat location attachment. This creates a point on the map specifying the latitude and longitude of the point.
	Properties – Edit the properties of the selected attachment.
	Delete All – Erase all attachments created for this map.
	Delete Selected – Delete the selected attachment.
