Mapping Pane Toolbar

Use the Mapping Pane toolbar for key functions and views in Mapping.

	Roads – Toggle background roads off and on.
	Background Imagery – Toggle background imagery off and on. • When navigating between fields, turning off imagery improves speed. • The mouse scroll wheel zooms in one step with each click of the wheel.
	Attachments – Display attachments created in the Attachment Editor. Toggle attachments off and on.
	Dimensions – Display dimension lines only as created in the Attachment Editor in conjunction with **Attachments**. Toggle dimensions off and on.
	Transparent Regions – Set all regions (fields and some layers) to appear transparent. Toggle this feature off and on.
	Print Current Screen – Print a view of what is currently in the *Mapping* window
	Zoom In – Select and draw a rectangle on the map to zoom in. • **Shift** + **right-click** to draw a box around a specified area to zoom in. • The mouse scroll wheel zooms in one step with each click of the wheel.
	Zoom Out – Select and draw a rectangle on the map to zoom out. • **Shift** + **right-click** to draw a box to quickly zoom out for a specified area. Drawing a small box zooms out farther than a large box. • The mouse scroll wheel zooms out one step with each click of the wheel.
	View – Set the *View* to *Full*, *Business*, *Farm*, *Field*, *CropZone*, *Item*, or *User view* to determine how to display the map. Full view Business view Farm view Field view CropZone view Item view User view

Measure – Measure an area or distance between points.

Editor – Select the *Attachment*, *Boundary*, or *View Extent Editor*.
