

# Setting Up Duplexing on 2200 LaserJet HP Printer

Last Modified on 12/21/2022 8:59 am CST

**Q.** How can a 2200 LaserJet HP printer be set up to print on both sides of the paper?

**A.** This option is only available with the PS driver.

Right-click the **Printer** icon and choose **Printer properties**. Then, in the bottom of the window, choose **Preferences**.

On the *Printing Shortcuts* tab, change *Print on Both Sides* from *No* to *Yes, flip over*. Select **Apply**, **OK**, then **OK**.
