Error 'Workgroup info.file Missing' While Restoring Agvance Database

Q. The complete error message is: 'Cannot start your application. The workgroup information file is missing or opened exclusively by another user.'

This error message occurs immediately after selecting the database image to restore and occurs because the database image files are on a CD or zip drive.

A. Copy the database images (*.dat files*) and *agvsec.mdb* to the folder to which you are going to restore before running the Restore utility.
