

Location Setting for Applicators

Last Modified on 06/24/2025 11:28 am CDT

Q. An Agvance user does not have access to applicators when invoicing. Is there a setting I need to change?

A. Applicators can be set to a specific location in Agvance but they do not have to be attached to a location. Depending on the level of security needing set for the user, there are a few options.

1. On the *General Restrictions* tab at *Hub / Setup / Users / Edit*, set the user's *Applicator Location Default* to *Current*.
This will allow the user to see the applicators associated with the location they are logged into (the global location).
2. On the *General Restrictions* tab at *Hub / Setup / Users / Edit*, set the user's *Applicator Location Default* to *All*. This will allow the user to see all applicators regardless of the location they are associated with even if they are not set to a specific location.
3. On the *Additional Info* tab on the Invoice, change the location selector to *All* to see all applicators regardless of the location they are associated with even if they are not set to a specific location.
