

SQL Server Installation

Last Modified on 03/14/2023 3:47 pm CDT

Agvance uses an instance of Microsoft SQL Server to store business data. However, SQL Server is not included as part of the Agvance install download. A copy of SQL Server may be purchased from a software vendor, or download the free SQL Server Express edition directly from Microsoft.

For assistance installing SQL Server, please contact the IS Support department at SSI at 800-752-7912.
