

Restricting Duplicate Farm and Field Names

Last Modified on 07/16/2025 9:25 am CDT

Unique Farm and Field descriptions are enforced by selecting a setup option that restricts duplicates.

Select the *Enforce Unique Field Descriptions* option at *Hub / Setup / Company Preferences / Field* or the *Enforce Unique Farm Descriptions* option at *Hub / Setup / Company Preferences / Farm*.

When utilized, this preference restricts saving multiple fields with the same field description for a customer when the fields are tied to the same farm or if neither field is tied to a farm.

The screenshot shows the 'Field' tab selected in the top navigation bar. On the left, under 'Field Inputs', a list includes 'Application', 'Cash Rent', 'Conventional Till', and 'Cotton Harvest'. In the center, the 'Cross Reference' section contains three rows: '1 Cross Ref1', '2 Cross Ref2', and '3 Cross Ref3'. On the right, there are three checkboxes: 'Enforce Unique Field Descriptions' (highlighted with an orange box), 'Require Field Descriptions', and 'Require Farm On Fields With Boundary'.

Similarly, when the option is utilized for farms it restricts saving multiple farms with the same farm description for a customer.

The screenshot shows the 'Farm' tab selected in the top navigation bar. On the left, there are two buttons: 'Classifications' and 'Attributes'. In the center, there is a 'Mapping Farm Name' section with a dropdown menu currently set to 'Farm Description'. On the right, there are two checkboxes: 'Enforce Unique Farm Descriptions' (highlighted with an orange box) and 'Require Farm Descriptions'.
