

# Purchase Additional Licenses for Agvance System

Last Modified on 04/22/2024 3:25 pm CDT

Fax back to 877.402.2204 or scan and email to sales@agvance.net

The original license agreement and fee covers the use of Agvance on the number of computers you had at that time. Adding workstations adds value to the computer system giving more people the opportunity to help with daily transactions. Expanding the number of workstations allows more users to benefit from the wide variety of information available through the Agvance system.

Additional user licenses will need purchased for any modules needing added to existing systems or to new workstations. Upon receipt of this signed order form, the SSI support team will help install and activate the modules on new or existing workstations. An invoice will be sent later for these additional licenses.

In the *Quantity Added* column, indicate the number of new computers needing access to each module.

<b>Company Name</b>			
<b>Contact</b>		<b>Date</b>	
<b>City</b>		<b>State</b>	
<b>Ph#</b>		<b>Fax#</b>
