

Canada Fertilizer Tags - NU

Last Modified on 12/08/2022 11:08 am CST

Create and print State Fertilizer Tags from Agvance that detail a fertilizer blend's analysis and overall nutrient content.

Setup

Calculate and display nutrients on the State Fertilizer Tag.

1. At *Hub / File / Product*, open the desired product in Agvance and navigate to the *Blend Setup* tab to enter the product's *Nutrient Contributor Information*, *Chemical Composition*, and *Fertilizer Ingredients*. Ammonium Thiosulfate is used in this example.
2. Enter the product's fertilizer analysis in the *Nutrient Contributor Information* section.
3. Select **Details** to access the *Chemical Composition* window to set nutrient values.

The screenshot displays the 'Blend Setup' tab in the Agvance software. The interface includes several input fields and dropdown menus. The 'Consistency' section has radio buttons for 'Solid (dry)' and 'Liquid', with 'Liquid' selected. The 'Product Density' is set to 11.04 Lbs/Gal. The 'Rate/Acre Units' and 'Blending Units' are both set to 'Lbs'. The 'Nutrient Contributor Information' section shows input fields for N (12), P, K, S (26), HA, Ca, Mg, Zn, Fe, Mn, Cu, and B. A 'Details' button is highlighted with a red box.

Example: For Ammonium Thiosulfate, enter values on the N and S tabs.

Chemical Composition

Other / Water Soluble and Water Insoluble:			

Chemical Composition

N P K Mg Mn Zn Fe Cu S Ca Lime Info Gen

% Combined Sulphur	100
% Free Sulphur	0

Note: The numbers listed in these columns are percentages and must add up to 100 for each respective nutrient.

4. Select **OK** on the bottom right to save the Chemical Composition.
5. On the *Blend Setup* tab, enter the product's *Fertilizer Ingredients* information. Type an ingredient name in each row and check the box to the right to designate which nutrient is supplied by that ingredient.

8. Once the desired information, analysis, and tolerances are set, select **Save**.

Printing the Sate Fertilizer Tag

1. Create a Blend Ticket in Blending.
2. When printing the Blend Ticket, check the *Print State Fertilizer Tag*, *Print Blend Ticket Number*, and *Print* options in the *State Fertilizer Tag Options* section. Choose **OK**.
