

Reported vs. GIS Acres - SKY Mapping

Last Modified on 08/01/2025 10:55 am CDT

When making edits to a field boundary in SKY Mapping edits will be made to the GIS Acres in Agvance.

1. Upon saving the field, the GIS Acres will be updated in the Hub.

The screenshot displays the SKY Mapping application interface. The top navigation bar includes icons for Fields, Recs, Events, Layers, Import, and a double arrow icon. The right side of the top bar contains icons for Extent, Measure, Search, Draw, Undo, Redo, and Delete. The main content area is divided into two panels. The left panel, titled 'Barry's East Field', shows the field's name, owner (Barry Anderson), and farm (Fred Anderson Farm). The '65.53 acres' value is highlighted with an orange box. Below this, the 'General Information' section includes fields for Field Name, Farm Name, Irrigated status, Field Classification, and Agvance Billable Area (65.53). The right panel shows a map of the field boundary, outlined in white, with a brown fill. The map includes labels for '1300 North Rd' and 'E 1300 North Rd'.

Barry's East Field
Barry Anderson
Fred Anderson Farm **65.53 acres**

2. SKY Mapping will **not** update the Reported acres.

- Reported Acres are the acres the Grower says are in the field.
