Agvance SKY User Activity Dashboard

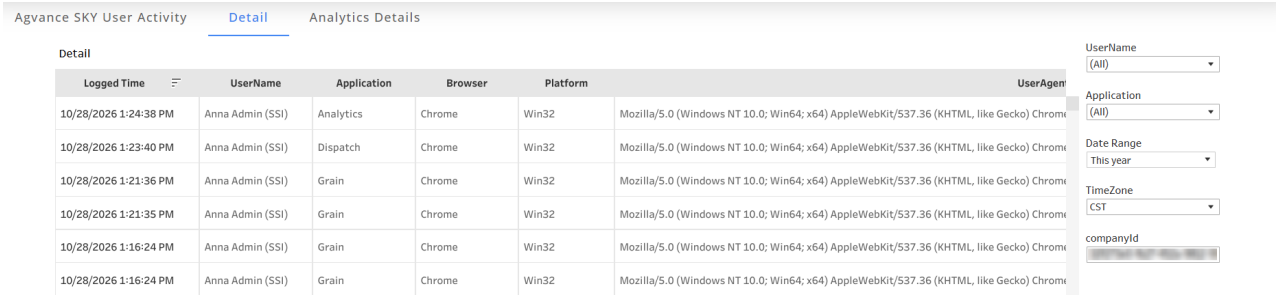

Last Modified on 10/28/2026 3:18 pm CDT

The Agvance SKY User Activity dashboard shows a view of what applications are being used and how frequently. This dashboard shows when the User last had a logged event. Selecting the **Printer** button gives a detailed view with every log occurring in that time frame.

Filter based on *UserName*, *Date Range*, *TimeZone*, and/or *Application/Feature*.

The *Detail* tab provides the *Logged Time*, *UserName*, *Application*, *Browser*, *Platform*, and *UserAgent* with the ability to filter by *UserName*, *Application*, *Date Range*, *TimeZone*, and *companyId*.

The *Analytics Details* tab gives information regarding *Workbook Access by Project*, *Workbook Access per User*, and *Number of users vs Number of Accesses*. Optionally filter this tab by *Date Accessed*, *Project*, *Workbook Name*, and/or *User Name*.
