This dashboard honors user restrictions based on Product Location.

Product Reorder Dashboard ?

Dashboard honors user restrictions based on product location.

Product ID	Department ID	Location ID		Amount on hand	Reorder Level	Difference	Difference in %
10-10-10Bg	Bag00	00MAIN	Reached Reorder Level	657.000 Bags	1,000.000 Bags	-343.000 Bags	-34.300% <div></div>
13-13-13Bg	Bag00	00MAIN	Reached Reorder Level	50.000 Bags	75.000 Bags	-25.000 Bags	-33.333% <div></div>
19-19-19Bg	Bag00	00MAIN	Product on hand	600.000 Bags	0.000 Bags	600.000 Bags	0.000% <div></div>

Purpose

The Product Reorder dashboard gives the ability to see if a Location is close to running out of particular Products based on which could be reordered or if products could be transferred from one location to another so as to not run out.

Details

The dashboard gives an overview of all products with the *Amount on hand* versus the *Reorder Level* defined. Filter by *Department ID*, *Product ID*, *Sales Class*, and more. An additional filter exists to filter Products that have reached the *Reorder Level*.
