# Settings - Inform

Last Modified on 06/01/2022 11:59 am CDT

Under *Settings*, select the *App Theme*. *Device Default* uses the device's settings to determine if the app should display with the *Light* or *Dark Theme*. Alternatively, choose *Light Theme* or *Dark Theme* to ignore the device's settings.

Additionally, go to *Settings* to log out of the app.

Information regarding the app can be found here, as well. This information includes the *App Version* and the user currently logged in.
