

Job Application Efficiency Dashboard

Last Modified on 08/17/2023 10:20 am CDT

Purpose

This dashboard gives the ability to track how many hours the applicators spend applying product, waiting on product to be delivered to complete the job, and traveling between jobs. Decisions can be made regarding adding efficiencies to custom application, thus reducing costs, increasing customer satisfaction, etc.

Details

The Job Applicator Efficiency dashboard provides a quick overview of all metrics and helps understand the overall events. The *Breakdown by Hours* section helps relate contribution on different aspects of *Traveling*, *Waiting*, and *Working*. The *Activity Line Chart* can be used to view the trend.

The bottom sections help with Applicator and Vehicle involvement. Use the **Filters** to filter data by *Beginning Date*, *Ending Date*, *Location ID*, *Vehicle ID*, and/or *Applicator ID*.

Data for this dashboard comes from Apply. This dashboard honors user restrictions based on login location.
