

Grower360 Energy - SKY Admin

Last Modified on 02/27/2024 3:19 pm CST

Select **Setup** on the *Energy* card found at *SKY Admin / Grower360* in the *Setup* section.

Turn on the *Refill Requests* toggle to allow Grower360 users to request a refill for tanks. Terms are required in the *Add Propane Tank Refill Terms* section if the *Refill Requests* ability is turned on. These terms will be displayed to the Grower at the *Order* window. Select **Save** once terms have been entered.

Any terms for ordering any Energy Product should be listed here. Any minimum gallon or dollar requirements and information about the ordering process should also be included.

Note: Notifications for Energy Order Requests can be set up in SKY. See [here](#) for more information.

A screenshot of the 'Energy Reorders' configuration form. The title is 'Energy Reorders'. Below the title, it says 'Allow Grower 360 users to request a refill for tanks.' and there is a green toggle switch for 'Refill Requests'. Underneath, it says 'Add Propane Tank Refill Terms' and there is a large text area for entering terms. At the bottom right, there are 'Cancel' and 'Save' buttons.

Energy Reorders

Allow Grower 360 users to request a refill for tanks.

Refill Requests

Add Propane Tank Refill Terms

Propane Tank Refill Terms are entered here.
