## Purpose

The Price Level dashboard gives the ability to see what Price Levels were used on Invoices to make sure the selling product is at the appropriate price.

## Details

This dashboard honors user restrictions based on login location. View specifics at the Invoice number level. Filter by *Invoice Location*, *Product*, *Invoice Date*, and *Customer*.

**Note:** The price can be overwritten manually. Therefore, the dashboard would give the Price Level number, but the actual price may not match that Price Level number.
