STLM Open Storage - Hold

Last Modified on 05/03/2023 10:38 am CDT

In STLM, changing the *Hold* status on an Open Storage Scale Ticket split line will cause the schedules to be replaced based on the Open Storage or Open Storage-Hold defaults that are set up. Only Open Storage split lines may be placed on Hold. When the *Hold* flag is turned on or off, any pre-existing storage/service charges will be removed along with the Charge Start Date override on the split line. Mass Edit utilities will follow this same logic. Any split lines marked as *Hold* will be excluded from the Reshrink and Lock Utilities.

Rules

- Adding a Scale Ticket in Grain or Transferring a Scale Ticket from Grain Scale Interface
 - Adding a Scale Ticket uses the default schedules of Open Storage Hold when Hold is checked.
 - Hold can only be checked when the DPR is Open Storage.
- Grain Scale Interface
 - On the Scale Ticket, dock and shrink will use the default schedules of *Open Storage Hold* when *Hold* is checked.
- Transferring a Scale Ticket from Grain Scale Interface
 - Auto Transfer/Review and Transfer
 - Transferring a Scale Ticket will use the default schedule of Open Storage Hold when Hold is checked
- Editing a Scale Ticket to Check Hold
 - DPR must be Open Storage.
 - When *Hold* is checked, the Scale Ticket will use default schedules for *Open Storage Hold*, clear out any pre-existing storage/service charges that have been accrued, and the *Charge Start Override Date* will be blank.
- Editing a Scale Ticket to UncheckHold
 - The schedules will change to the default schedule of the disposition on the Scale Ticket.
 - Any pre-existing storage/service charges will be removed and the *Charge Start Override Date* will be blank.
 - When changing the DPR of a split line to something other than Open Storage, Hold will be unchecked.
- Editing a Scale Ticket and Splitting a Line Set toOn Hold with Settled Units
 - The Hold status of the line will go to the new split line.
- Lock Scale Tickets and Reshrink Utility
 - When a Scale Ticket split has a DPR of Open Storage and Hold is checked, the Scale Ticket split will not be set as Reshrunk.
- Mass Edit Split Values Utility
 - If the DPR selection is not set to Open Storage, Hold cannot be checked.

- If there is a mixture on Scale Ticket splits selected with different *Hold* statuses, only the splits with the DPR set to *Open Storage* can be set to *Hold*.
- Checking Hold
 - If the Scale Ticket split record had *Reshrunk* checked, it will be unchecked.
 - Set schedules on Scale Ticket splits to Open Storage Hold defaults.
 - Any pre-existing storage/service charges are cleared out.
- Unchecking Hold
 - Set schedules on Scale Ticket splits to default schedules of the disposition.
 - Any pre-existing storage/service charges will be removed and the Charge Start Date will be set to the Scale Ticket's date.
- Mass Edit Ownership Values Utility
 - When split lines are set to Open Storage Hold, the Open Storage Hold default schedules will be used.
- Mass Edit Transfer Units
 - If a Scale Ticket split has the DPR set to Open Storage with Hold checked, the transfer Scale Ticket split line will also have Hold checked and options to select a DPR and Purchase Contract are disabled.

Open Storage - Hold Defaults

In Grain STLM, there is the ability to set default Charge, Shrink, Dock, and Drying schedules by Commodity/Location for Scale Tickets in Open Storage that are set to on *Hold*.

Charges are set up by editing/adding a Commodity at Grain / Setup / Commodities and selecting Setup Charges.

С	ommodity Barley Location 00MAIN	settlements when they are cr	eated. Spec	orage Charge Schedule that will be ap ify how pre-existing and initial charge Id be used if Charges are invoiced.		be
