

November 2023 SKY Release Notes

Last Modified on 11/29/2023 7:10 am CST

Analytics

- **AN-2661 / Invoiced to Booked Comparison Dashboard** – The Invoiced to Booked Comparison dashboard under *Customer* shows what a customer booked versus for what they were invoiced.
- **AN-2658 / Settlement Contract Signature Status Dashboard** – The Settlement Contract Signature Status dashboard under *Grain* can be used to track which Settlement Contracts have been electronically signed and when grain clerks need to ensure contracts are signed within a certain number of days of the contract being established.
- **AN-2660 / Sales by Salesperson Override Dashboard** – The Sales by Salesperson Override dashboard under *Accounts Receivable* uses the Salesperson Overrides by Department that can be set up on a customer.

Customer

- **SKYW-3436 / Plan Filters** – Filters are now available to narrow down the list of Plans.
- **SKYW-3506 / Field Filters** – Filters are now available when viewing Fields in SKY Customer.

Dispatch

- **SKYC-2691 / Scheduling by Date** – Blend Tickets and Delivery Jobs can now be scheduled by date. For more information, see [List View - SKY Dispatch](#).

Mapping

Version 3.23

Web

- **HW-9487 / Application Event/Rec Changing Mix Type** – Manual Application Events, Import Application Events, and Manual Application Recs now give the ability to change to a different Mix Type (*Fertilizer*, *Chemical*, or *Manure*) when viewing/editing.
- **HW-10229 / Equation Rec Min Rate** – The Equation Rec Min Rate displays as expected.
- **HW-10486 / Import Harvest/Planting** – Raw monitor values can now be displayed for Varieties and Products in the *Import* panel. The Crop, Brand, and Variety for all imported Planting and Harvest Events are displayed in Layers and Reports. New Surfaces include *Harvest-Variety*, *Planting-Variety*, and *Application-Product*.
- **HW-10506 / Application Map Custom Imagery** – The *Custom Imagery* report option used with the Application Map report works as expected.

- **HW-10617 / Equation Recs Zero Rec Area** – The *Min Rate* on an Equation Rec remains at a zero when rate adjustments are made as expected.
- **HW-10804 / Equation Recs** – Creating Recs works as expected and does not result in an endless spinner.
- **HW-10832 / Report Books Cover Pages** – Report Books generate cover pages as expected.
- **HW-10840 / SKY Soil Test and SKY Soil Test Results Reports Attributes** – Four Attributes were added to the Page Selection/Attribute Selection and the SKY Soil Test, Soil Test Map, and SKY Soil Test Results reports - *Ca/Mg-Ca_Mg*, *K/Mg-K_Mg*, *WHC-Water_Holding_Capacity_in_ft*, *Elevation-Elevation_ft*.
- **HW-10853 / Equation Rec Multiple Sampling Events** – Equation Recs use all Sampling Events when there are multiples per Season. If there are overlapping samples, the sample with the most recent *Event Start Date* is used. If two or more samples have the same *Event Start Date*, the *Modified Date* is used.

Mobile

- **HW-10344 / Sampling Grid Stats and Multiple Points per Grid** – An unlimited number of Sample points per grid is now allowed. A new Sampling setting called *Display Sample Stats* displays at the bottom of the Sampling settings. Additionally, the following statistics were added: *Field Area* (current area of the field), *Included Area* (area of included zones), *Total Samples* (number of Samples added with composite points counted as a single Sample), and *Area Per Sample (Included Area / # of Samples)*.

Version 3.22

Web

- **HW-8513 / Non-Field Features** – An *Inactive* status has replaced the permanent delete with Non-Field Features.
- **HW-10612 / Yield Calibration** – The Yield Calibration context menu is disabled until Event processing has started on an imported Harvest Event.
- **HW-10640 / Loadsheet Rec Crop and Yield Goal**– The Loadsheet now includes the Crop and Yield Goal for Equation Recs. If the Product Rec has multiple crops or multiple Yield Goals, the word *Multiple* will appear. If the Crop includes a Crop Purpose, the purpose appears in parentheses next to the Crop Name.
- **HW-10745 / Equation Rec Sampling Depth** – The *Sampling Depth* drop-down only displays if the Sampling Event being used for the Rec has multiple depths as expected.
- **HW-10746 / Import Files Info** – Monitor IDs matching multiple profiles display the duplicates so the correct profile can be selected.

Mobile

- **HW-10224 / Field Setup** – If the Field Boundary polygon overlaps another Field's boundary of the same customer, an *Overlap Detected* message will display with options to *Clip New Field to Existing*, *Clip This Edit to*

Other Field, Clip Existing Field to New Field, Update Other Field to This Edit, and Cancel.

- **HW-10336 / Mobile Sync** – A *Minimum Polygon Size* prompt has been added stating *You must have at least 1 boundary that is greater than 0.01 acres.*
