API 7.0.24420 | 11.14.2023

- **FTM-3539 / Put Customer Extra Charges** – The PUT customer is now able to accept the list of Extra Charges as a data element to update. When this property is excluded or set to null, no change will happen on the customer. Sending in an empty array "[]" will clear all extra charges for that customer. Validation requires these to exist in the Agvance database and duplicates are not allowed.
