Dashboard Does Not Open After Selecting - Agvance SKY Analytics

Last Modified on 08/05/2026 12:13 pm CDT

A change was made in Analytics to use Tableau's Connected Apps, which gives the ability to log into Tableau without using the **Sign In** button.

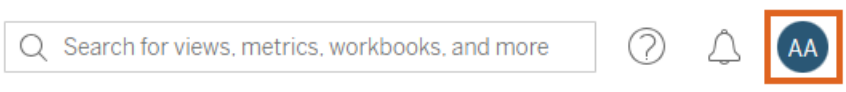

If signed into one Tableau site but signed into a different company in SKY, the spinner displays after selecting a dashboard and then displays an error message after two minutes. This affects anyone who actively logs into multiple companies and Tableau sites.

If the steps listed on the *Signing In* tab do not solve the issue, check the *Apple Settings* or *Android/Windows Settings* tab. The issue could be due to third-party cookies not being enabled.

Signing In

There are two ways to resolve this:

1. Use an incognito browser.
    - Assuming not already signed into Tableau in an incognito browser window, sign into Agvance SKY and view a dashboard in Analytics. All incognito tabs and windows open at the same time share the same session. This means that at any given time, one may only log into a maximum of two different Tableau sites / Agvance SKY companies - one site in a normal browser window and the second site in the incognito browser window.
    - There are three ways to open an incognito browser:
        - Right-click the **Chrome** icon and choose *New Incognito Window*.
        - Select the three dots in the top-right of a browser window and choose *New Incognito Window*.
        - With a regular Chrome browser window open, use the keyboard shortcut **Ctrl+Shift+N**.
2. Sign out of Tableau and sign out of Agvance SKY.
    a. Navigate to **https://tableau.agvancesky.com**, select the **Profile** icon in the upper right-hand corner of the screen.

    b. Choose *Sign Out*.
    c. Next, navigate to **https://sky.agvance.net**.
    d. Select the **User** icon in the upper right-hand corner.
    e. Choose *Sign Out*.
    f. Proceed with signing into Agvance SKY with the User needing to view the dashboards.

Apple Settings

Safari

In Safari, the *Prevent Cross-Site Tracking* option is enabled by default and interferes with the way cookies are used to authenticate Agvance SKY access to Tableau.

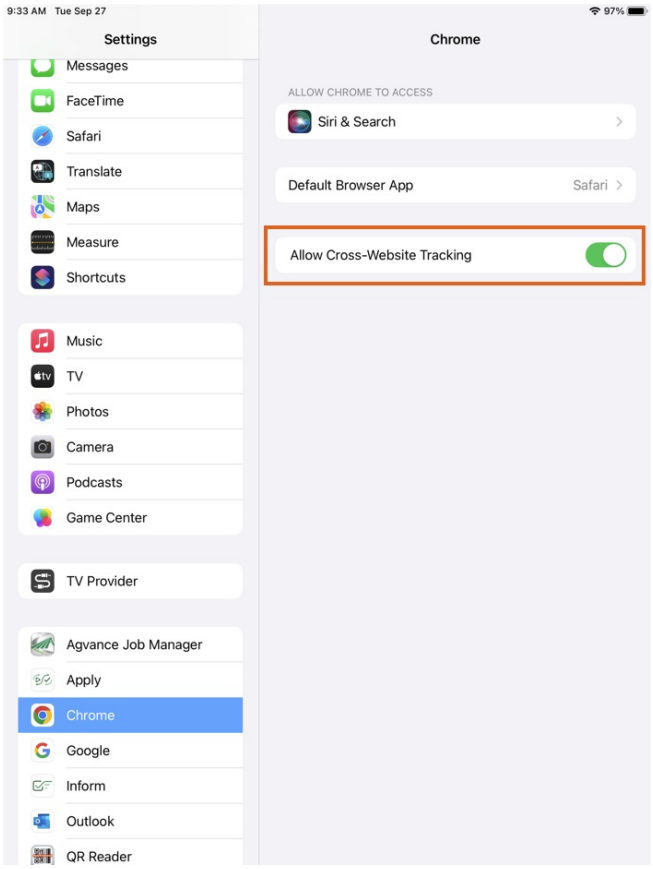

To turn off this option on a mobile device, go to Safari Settings. In the *Privacy & Security* section, turn off the *Prevent Cross-Site Tracking* option.

Chrome

In Chrome, the *Allow Cross-Website Tracking* option is disabled by default and interferes with the way cookies are used to authenticate Agvance SKY access to Tableau.

To turn on this option on a mobile device, go to Chrome Settings and turn on the A*llow Cross-Website Tracking* option.

Mac Desktop

On a web browser, access Safari Settings. On the *Privacy* tab, disable the *Prevent cross-site tracking* option.

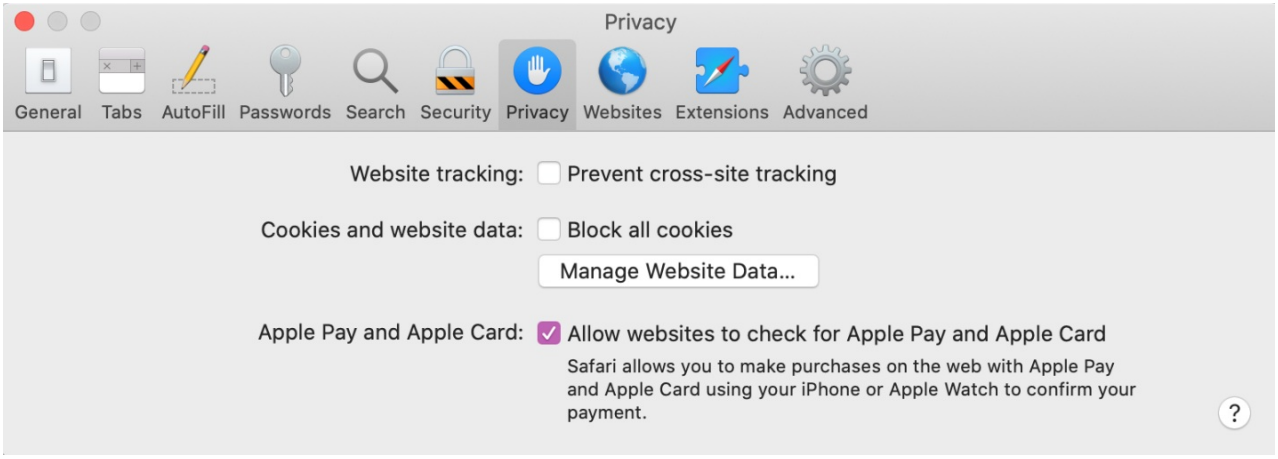

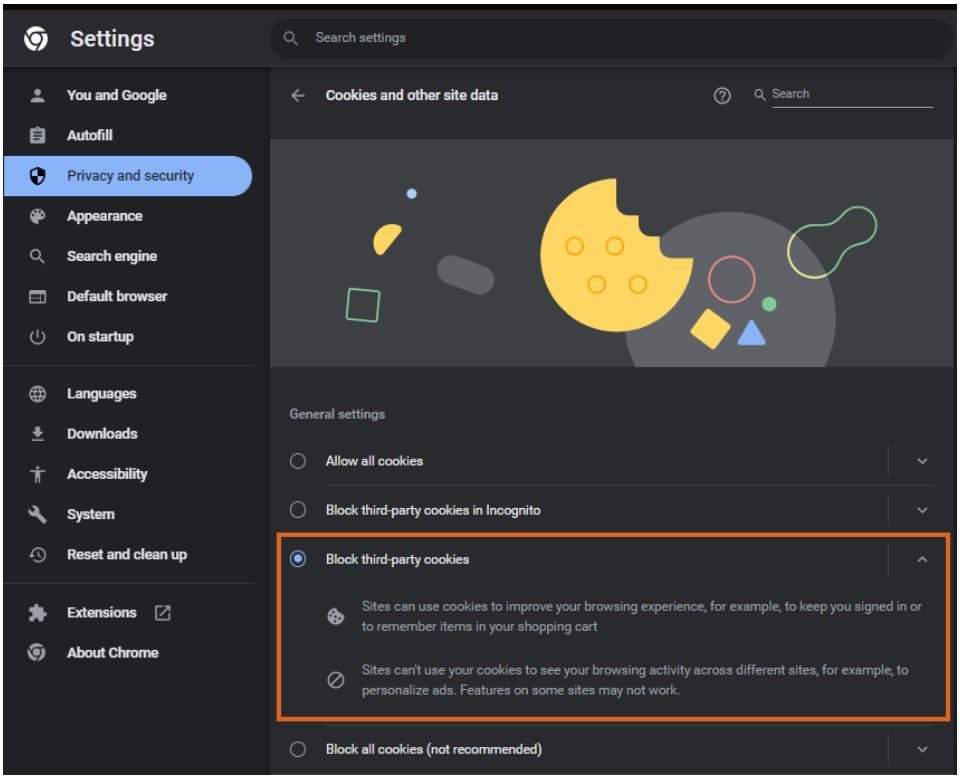

Tableau has documented this issue as well here.

Android/Windows Settings

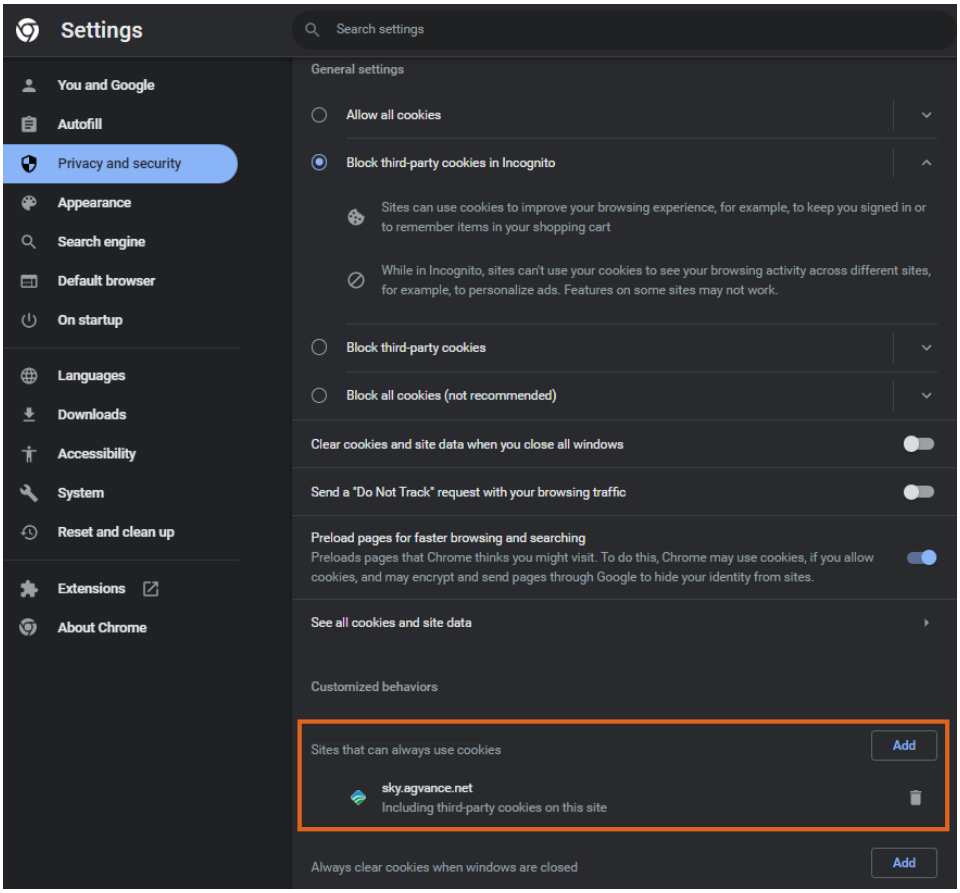

Windows Desktop

On a Chrome browser, navigate to *Settings / Privacy and Security*. If the *Block third-party cookies* option is enabled,

Tableau will be inaccessible.

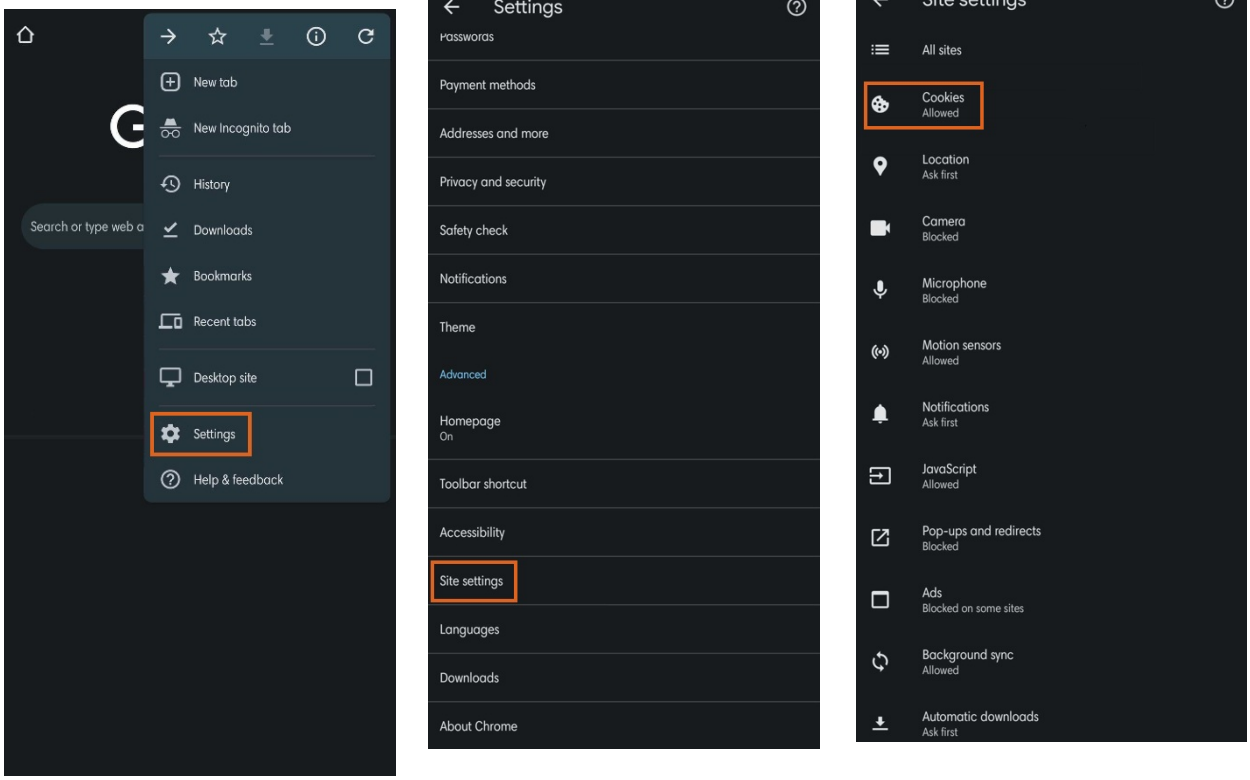

Change the option to either *Allow all cookies* or, to block third party cookies on most sites, set up sky.agvance.net as a *Site that can always use cookies*, including third-party cookies.

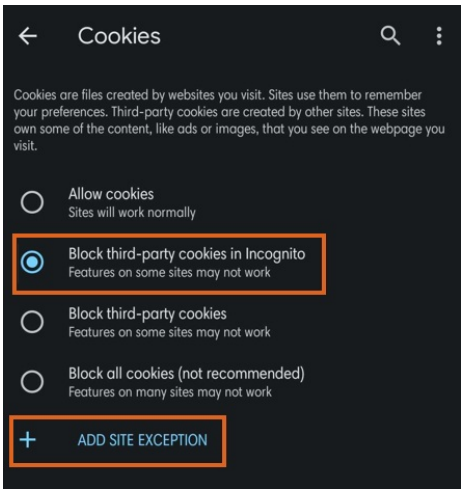

Android Mobile

Open a Chrome browser, tap the **Vertical Ellipsis**, then go to *Settings / Site settings / Cookies*.

If the *Block third-party cookies* option is enabled, Tableau will be inaccessible.

Change the option to either *Allow all cookies* or, to *Block third-party cookies in Incognito*, set up **sky.agvance.net** as a *Site Exception*.
