December 2023 SKY Release Notes

Analytics

- **AN-2596 / SKY User Permissions Dashboard** – To see the roles a SKY User has, view the *SKY User Roles* tab.

Customer

- **SKYW-3645 / Energy Tanks Current Conditions** – The Tank's Lat/Lon will be used for *Current Conditions*. If not present, the Tank's address will be used.

Dispatch

- **SKYC-3148 / Edit Applicator/Driver Grid** – Double-click a cell in the *Applicator/Driver* grid to make edits.
- **SKYC-3040 / Location in Delivery Driver Setup** – The Location of the Delivery Driver is now available as a column in the setup grid which can be viewed and/or edited.
- **SKYC-3038 / Product Sets** – Product Sets can now be set on Blend Tickets in SKY Dispatch.

Mapping

Version 3.24

Web

- **HW-9880 / Application Event/Rec Chemical New User** – A second product can be added to a Chemical Mix as expected.
- **HW-10063 / Non-Field Feature** – The Org Level Quick Changer and Customer Level User Setup filters Non-Field Features down to the *Customer* filter option and *Customer User Type* affiliation.
- **HW-10150 / Equation Rec Switch Rate** – The *Max Rate*, *Min Rate*, and *Switch Rate Minimum Setting* work as expected.
- **HW-10200 / SKY Mapping Crop Planning Report** – A *Crop Zone* option gives the ability to print the Crop Planning Report using Management Area Analyses created with the *Crop Zone* template or Manual Planting recs. If a field has multiple Management Areas per Season, one page per Management Area is generated. Additionally, a new drop-down report option called *Agvance Crop Color* was added which includes options of *Crop*, *Crop Purpose*, and *Crop Chemistry*. When linked, these colors will come from Agvance Crops.
- **HW-10526 / Layers - Split Screen Compare - User-Defined Area Stat Tool Enhancements** – It is now possible to create splits and internal polygons as well as edit their vertices within the Split Screen Compare tool to compare their statistics. Additionally, a new Polygon Zone Tool was added to the Split Screen Compare tool that can be accessed using the new icon to the left of the **Table** icon.

- **HW-10789 / Sampling - Batch Copy/Add** – The Batch Copy of Sampling Events and Batch Create Event of Sampling Events for Soil and Tissue work as expected.
- **HW-10791 / Equation Rec - Lime Rec - Add Custom Blend Support** – Add and Edit Custom Blend behavior was added to Lime Recs like other Nutrient Rec types with the ability to add Service products with a custom blend.
- **HW-10822 / Loadsheet Product Detail Per 100-gal Rate** – The Product Detail version of the Loadsheet report displays the correct rate for the *Per 100-gal* unit in the *Chemical* section of Manual Recs.
- **HW-10824 / Equation Rec - Applied Avg Rate** – The Equation Rec Product Rec screen displays the Applied Avg Rate as expected.
- **HW-10843 / Import - Harvest** – Harvest Events can be created and surfaced as expected.
- **HW-10844 / Equation Rec - Multi-Depth Sampling** – Equation Recs support multi-depth Sampling Events resulting in the expected surface.
- **HW-10849 / Action Panel Search** – Selected Fields display in their selected orange symbology as expected.
- **HW-10850 / Export Controller File - Multi-Product Option** – The Export Controller *Multi-Product* option removes excluded Zone Areas as expected.
- **HW-10851 / SKY Field Record Notebook** – A new drop-down report option is now available called *Agvance Crop Color* which includes options of *Crop Crop Purpose*, and *Crop Chemistry*. When linked, these colors will come from Agvance Crops.
- **HW-10861 / Import - Sampling** – The *Explode Zone* option works as expected.
- **HW-10865 / Equation Rec Batch** – The **Cancel** button is enabled giving the ability to cancel a batch session as expected.
- **HW-10892 / Import Sampling Tissue** – Tissue Sampling Events with results import and create an Event as expected.
- **HW-10899 / Event/Rec - Service Product** – Service products can be added as the first or only product for the Application Event and Manual Application Rec as expected.
- **HW-10914 / Equation Rec** – The Natural Log function Equation Rec syntax works as expected.

Mobile

- **HW-10467 / Scouting - Device Caching** – Scouting Event Crop templates are not saved in the cache on local devices as expected.
- **HW-10587 / Scouting - Unsaved Status** – Scouting Events save as expected.
- **HW-10903 / Minimum Polygon Warning** – The **Remove** option on the *Minimum Polygon Warning* works as expected.

Order

- **SV-1483 / Sales Order Contracts** – A *Sales Order Contract* format can be selected when adding a Sales Order

which will give the ability to download the contract.

- **SKYD-18 / Blends - Field Near School** – An icon will display on the Field when adding a Blend if the Field is in the Classification selected in the *Field Classification Within 500 Ft of School* area at *Hub / Setup / Preferences* on the *Field* tab.
