Blend Jobs in Schedules View - SKY Dispatch

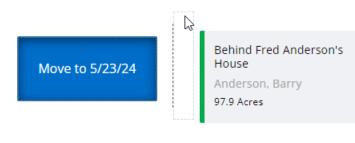

Last Modified on 10/30/2024 3:28 pm CDT

Selecting **Schedules** in SKY Dispatch shows jobs by Applicator with the ability to reorder and reassign jobs.

Use the *Viewing* menu to switch between Blend and Delivery Tickets. Filter Applicators by using the *Filter Applicators* field. Optionally select the *Condense Job Details* toggle to view less or more job information.

- Choose Select All to choose all of an Applicator's jobs. Choosing Unassign All removes those jobs from that Applicator and updates *List View* accordingly.
- Use the navigation under *Condense Job Details* to jump to a certain date or get back to today's date without having to go through each day individually. Additionally, select the **Calendar** icon on the right to go to a specific date.
- Drag and drop jobs to either assign to other Applicators or to change the order jobs are to be completed and select **Save Job Order**. Additionally, jobs can be dragged to the right to schedule the next day.

• Right-click jobs in the menu to move to End of Day, Beginning of Day, Tomorrow, 2 Days Out, Select Another Date, Add Secondaries, or to Unassign job(s).
