

# API 7.0.24710 | 01.09.2024

Last Modified on 01/09/2024 11:51 am CST

- **FTM-3534 / New Endpoint - Update Product Pricing** – A new publish API method - PUT  
PriceLevel/PutProductPriceLevel - was added to allow the ability to update the pricing information on a given Product. The ability to set the List Price and all 24 Price Levels has been added. To prevent changing a Price Level for that Product, leave it out of the JSON and it will remain as the current price. Any formulas that are in place are not honored or used at this time.
