Agvance Version 7.0.25080 or above must be installed to have access to this PMR export.

The PMR export is available at *Accounting / Transfers / Export*.

Note: It will be required to send the IP address to Land O Lakes for whitelisting.

Setup Tab

The XML file will be created locally in temporary storage, then the contents of the file will be sent to the web service to be transferred. The web service has limitations of 100 Invoices per call. If there are more than 100 Invoices, it will require an additional web service call.

Note: SSI Support will need to assist with encrypting credentials to enter into this *Setup* area.

The screenshot shows a window titled "PMR Export" with two tabs: "Export" and "Setup". The "Setup" tab is active. The dialog contains the following fields and controls:
