Blend Jobs in Map View - Agvance SKY Dispatch

Last Modified on 11/19/2026 9:52 am CST

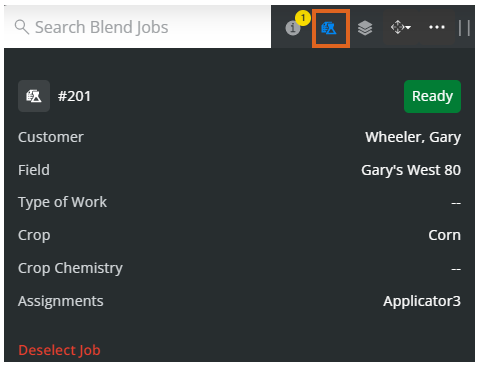

It is recommended to display the *List View* and *Map View* using dual monitors as they work in conjunction with one another. Use the *Filters* menu or *Search* field to narrow down jobs and the *Viewing* menu to switch between Blend and Delivery Tickets.

Search Bar

- **More Information** – This displays information for all selected jobs including *Product Totals*, *Work Type Totals*, and *Crop Totals* (if applicable). *Primary* and *Secondary* assignees can be indicated here for Blend Tickets. When assigning *Secondary* or *Tender Drivers* to multiple selected jobs, if all selected jobs already have the same *Primary Applicator* assigned, that *Primary Applicator* will automatically default in the assignment field. Select **Save Product Totals as PDF** to download totals as a PDF file.

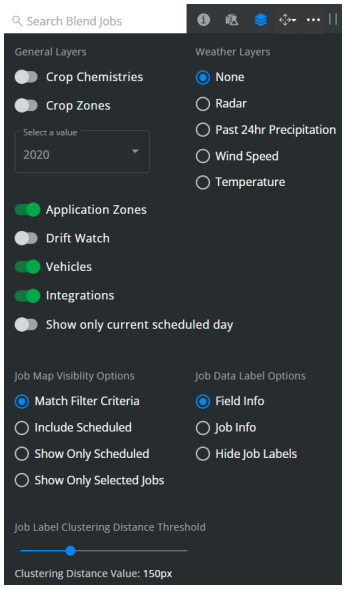

- **Selected Job Information** – View information related to the selected job(s).

- **Show Layers Panel** – This area provides display options for *General Layers*, *Global Layers*, *Job Map Visibility Options*, *Weather Layers*, and *Job Data Label Options*. Use the *Job Label Clustering Distance Threshold* to determine the number of labels appearing on the map. Turning on the *Integrations* toggle shows **Integration**

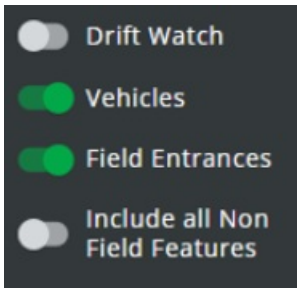

Devices turned on under *Personalize* on the *General* tab.

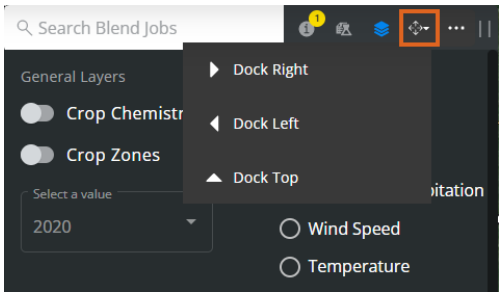

When the *Radar* option is selected, a legend displays at the bottom of the map to give more information on the data displayed.

Note: Turning on the *Field Entrances* toggle gives the option to *Include all Non Field Features* below.

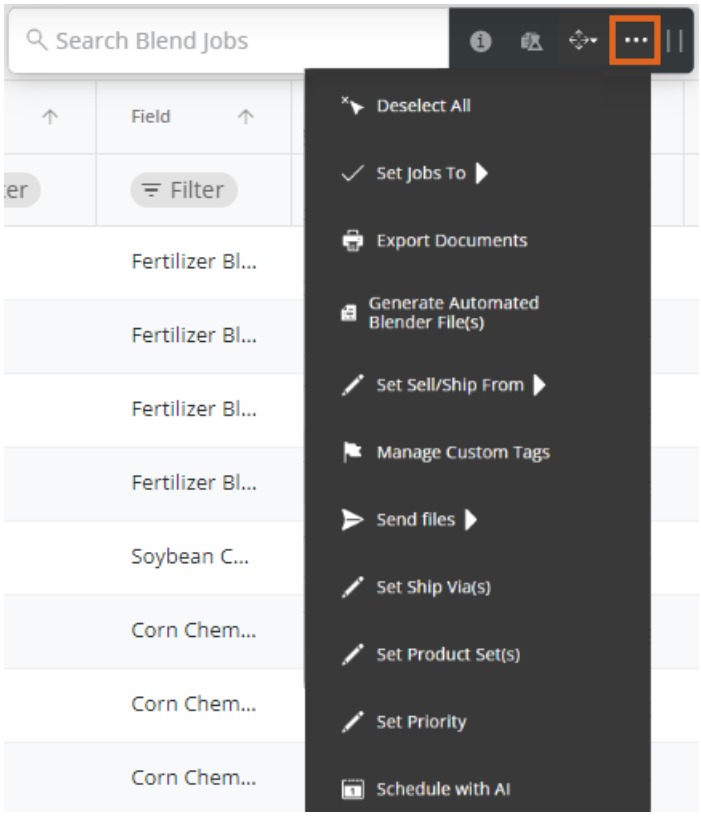

- **Dock Search Bar** – Dock the search bar to the right, left, or top of the screen.

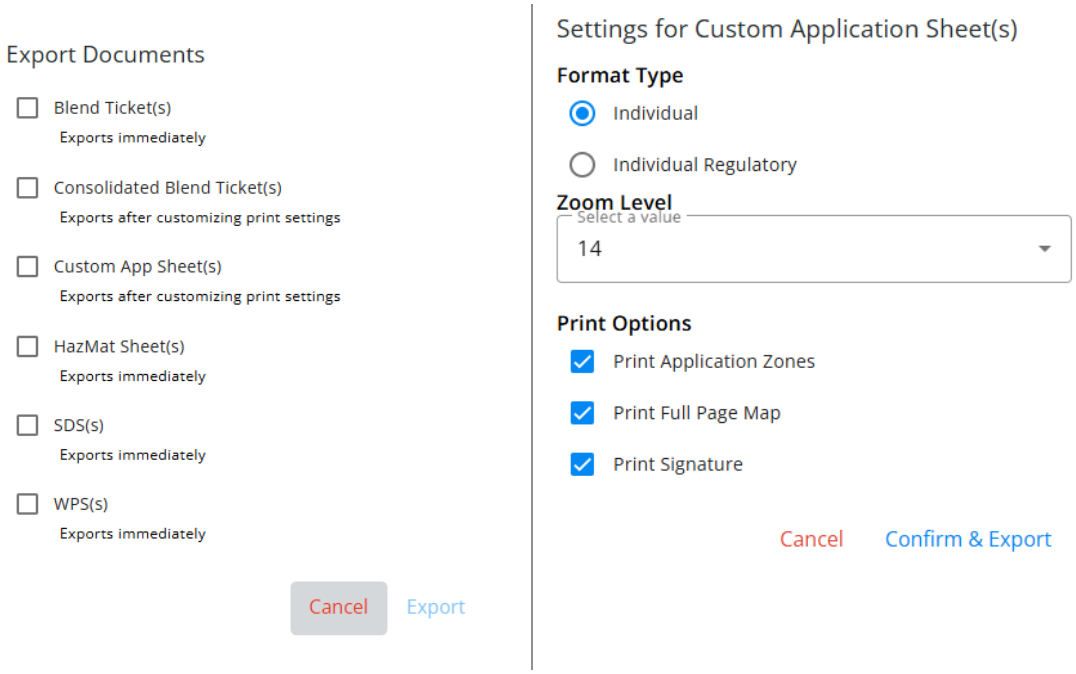

- **More Options Icon** – Choose the **Ellipsis** to *Deselect All*, *Set Jobs To (Ready*, *On Hold*, or *Completed*), *Export Documents*, *Generate Automated Blender File(s)*, *Set Sell/Ship From*, *Manage Custom Tags*, *Send Files*, *Set Ship Via(s)*, *Set Product Set(s)*, *Set Priority*, or *Schedule With AI*.

  Note: When choosing the Sell From, Ship From, Product Set, and/or Ship Via, beginning to type filters the options available in the drop-down.

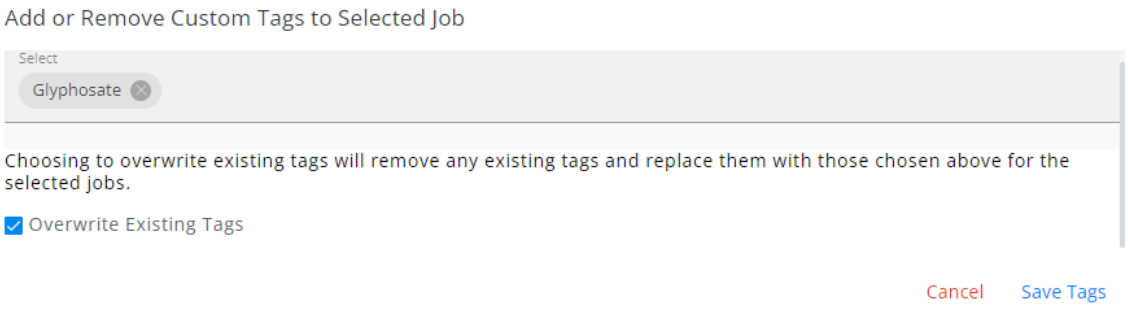

- **Export Documents** – With a job or jobs selected, choose **Export Documents** to export Blend Ticket(s), *Consolidated Blend Ticket(s)*, *Custom App Sheet(s)*, *HazMat Sheet(s)*, *SDS(s)*, and/or *WPS(s)* as a PDF. If exporting Custom App Sheets, additional print setting options display to confirm before exporting. Jobs will display in the order they are selected.

  Note: An established Agrian link is required to export SDS and WPS documents.

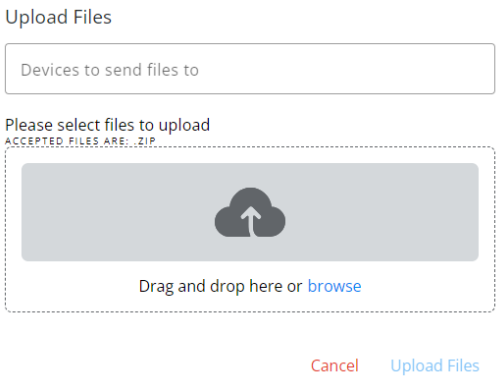

- **Manage Custom Tags** – Multiple jobs can have Custom Tags applied all at once by selecting the

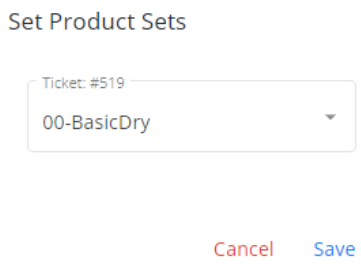

checkboxes for the appropriate jobs then selecting *Manage Custom Tags* from the **Ellipsis** in the search bar. Select a Custom Tag from the drop-down (scroll through the drop-down or start typing to search for Custom Tags already created on the *Custom Tags* tab under *Company Settings*). Checking the *Overwrite Existing Tags* option removes any existing tags and replaces them with those chosen in the area above.

- **Send Files** – Choose to send job files to Slingshot, MyJohnDeere, or Satloc accounts from Dispatch. Hover over *Send Files* and select the integration (*Slingshot*, *MyJohnDeere*, or *Satloc*) from the menu, then drag and drop or select **Browse** to locate the appropriate zip file.

- **Set Product Set(s)** – The *Set Product Sets* window displays to choose the Product Set from a drop-down for the job(s) selected.

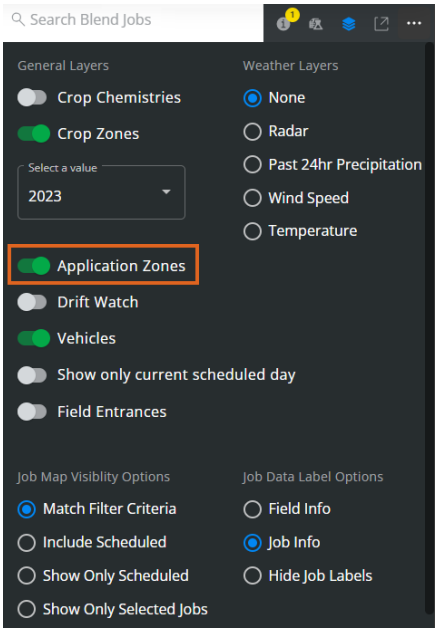

Map

The *Map* window displays real time updates of Applicator locations and job clusters. This information can be viewed in either *Map* or *Satellite* view.

The full Field boundary on the map can be displayed along with the Application Zone from Agvance SKY Mapping to help direct the Applicator to the Application Zone.

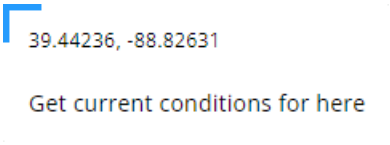

Turn on *Application Zones* on the *Layers* tab of the *Search* bar to enable this view.

Field boundary colors can be customized on the *General* tab in ***Company Settings***.

Jobs can be selected either by selecting the job on the *List View* window or by using the mouse scroll wheel to zoom in on a field boundary. Selecting the field or *Customer/Field* label selects that job.

Selecting an area on the map and holding or right-clicking gives the ability to see current weather conditions for that precise location.

A message displays on the map informing the number of Blend Jobs with no geo-coded Fields.

Turn on the *Vehicles* option to view the progress of specific jobs. Applicator icons display to show location. After 6 hours of being inactive, the icon is removed. Breadcrumbs will display on the map.

Global Layers from Agvance SKY Mapping display on the map.
