

MyJohnDeere - SKY Dispatch

Last Modified on 12/15/2025 4:04 pm CST

Link and send VRT files to MyJohnDeere accounts from SKY Dispatch.

1. In SKY Admin, select **My John Deere Login** to navigate to the login page and sign into MyJohnDeere through SKY. This is available under the *Integrations Setup* area to enter a company-wide API Key and/or the *Location Preference Setup* to enter a Location-specific key.

Note: The Location key trumps the Company-level key when tying Vehicles to a Machine ID and when sending files.

Remove Connection

- Once the connection setup is completed within John Deere Operations Center, return to SKY Dispatch to continue connecting John Deere devices to Agvance Vehicles.
- MyJD Monitors can be tied to Agvance Vehicles in the *Integrations Setup* grid under *Company Settings* in SKY Dispatch. The name defaults into the *Machine Alias* area but can be edited.
- On the *Jobs List* or *Map* view, after selecting the Tickets, the *More Options* menu gives the ability to *Send Files* to *MyJohnDeere*. Indicate the *Device to send files to* from the drop-down, then drag and drop or select **browse** to locate the appropriate zip file. Only integrations enabled in the Personalize tab are available to select as a device in the *Upload Files* window.

8. When assigning a job in SKY Dispatch, the *Integration Type* tied to the Vehicle that is tied to the Applicator being assigned is shown in the drop-down.
9. Select **Files** at the bottom of the screen to view a queue of transferred files and their statuses. This grid includes the *Machine ID*, *Integration Type*, *File Name*, *Status*, and *Date Transferred*. *Last refreshed xx minute(s) ago* displays below the *Items per page* drop-down. Refreshing the browser window updates the number of minutes.
 - o Common statuses and their meanings:
 - **In Process** – File has been sent to John Deere Operations Center.
 - **Success** – File was received by John Deere Operations Center.
 - **Available to Display** – File has been sent to device.
 - **Operator Accepted** – File has been downloaded to device by user.
 - **Operator Rejected** – User has deleted file prior to downloading to device.
 - **Queued** – File Received by John Deere Operations Center but device is offline.
