Slingshot - Agvance SKY Dispatch

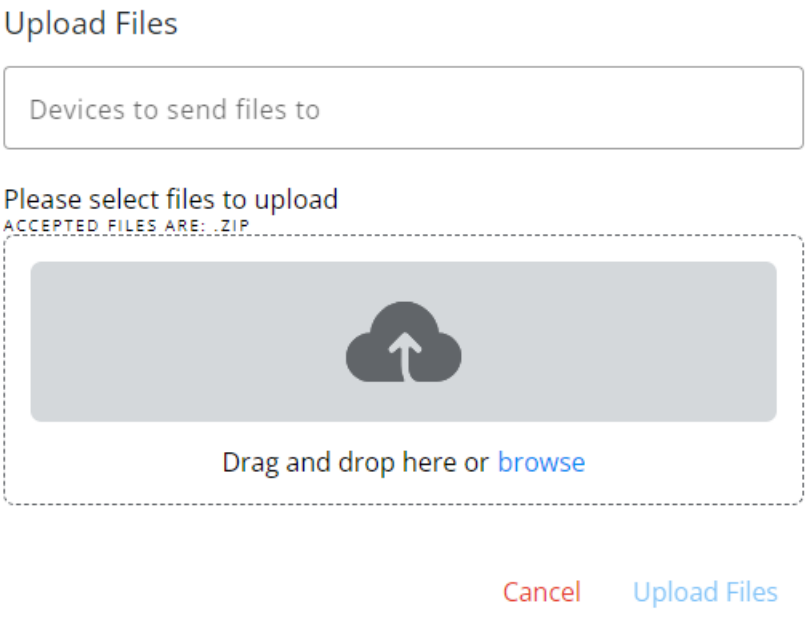

Last Modified on 07/07/2026 9:31 am CDT

Send files to Applicators through Slingshot in Agvance SKY Dispatch.

1. In Agvance SKY Admin under *Dispatch*, select the **Edit** next to *Slingshot URI* to edit that field. Enter *https://api.ravenslingshot.com* then choose the green **Checkmark**.

2. The **+** can be selected to enter the *Slingshot Key*. The *Enabled* toggle indicates if the key is active or not. Select the green **Checkmark** to save the key entered.
   Note: Multiple keys can be added here. Repeat Step 2 for each key.
3. Slingshot devices can be tied to Vehicles in the *Integrations Setup* grid under *Company Settings* in Agvance SKY Dispatch. The name defaults into the *Machine Alias* area but can be edited.
4. On the Jobs *List* or *Map* view, after selecting the Tickets, the **More Options** menu gives the ability to *Send Files* to *Slingshot*. Indicate the *Device to send files to* from the drop-down then drag and drop or select **browse** to locate the appropriate zip file. This area has the ability to select multiple devices and send multiple files at once. Only integrations enabled in the *Personalize* tab are available to select as a device in the *Upload Files* window.

5. When assigning a job in Agvance SKY Dispatch, the *Integration Type* and *Machine Alias* tied to the Vehicle that

is tied to the Applicator being assigned is shown in the drop-down.
