

# Kwiktag Test Connection - SKY Admin

Last Modified on 08/01/2024 1:54 pm CDT

Kwiktag connections can be tested under *Kwiktag* in SKY Admin.

Agvance sky  Company Admin ▾

The screenshot shows the SKY Admin interface. On the left is a dark sidebar with navigation items: Users, Grower 360, Task Center, Dispatch, Order, Sky Payments, Consumer Portal, Vendor, and KwikTag. The main content area is titled 'KwikTag' and contains the heading 'Test KwikTag URL Connection'. Below this, it displays 'KwikTag URL' as '99.9.999.999' and a blue button labeled 'Test URL Connection'.

The *Kwiktag URL* comes from the setup in Company Preferences. Select **Test URL Connection**. A message will display depending on the results of the test.

## PASS

### Test KwikTag URL Connection

KwikTag URL  
99.9.999.999

[Test URL Connection](#)

✔ **URL Connection Result: PASS**

## FAIL

### Test KwikTag URL Connection

KwikTag URL  
99.9.999.999

[Test URL Connection](#)

✘ **URL Connection Result: FAIL**

In order to set up KwikTag, Sky Agvance needs to be able to reach out to your KwikTag server. **You will need to whitelist IP 54.209.30.54 on port 80 so a connection can be made.** You may need to check with your tech team or IS team for further help.
