Grower360 Blend Tickets - Agvance SKY Admin

Last Modified on 07/06/2026 2:47 pm CDT

Select **Setup** on the *Blend Tickets* card at *Agvance SKY Admin / Grower360 / Orders*. To see a video of Grower360 Setup in Agvance SKY Admin, see here.

This gives the ability to show the ticket status to Growers by turning on the *Blend Ticket Status* option. Once the *Blend Ticket Status* option is enabled, different statuses display to indicate which should be shown to Growers. When finished, be sure to select **Save** in the bottom right.

Note: To display this information, the *Blend Tickets* option in the ***Divisions*** setup must be turned on.
