

Forecasting Tool - SKY Product

Last Modified on 03/06/2025 7:27 am CST

Use the Forecasting Tool in SKY Product to manually input or modify forecasted inventory quantities. These will be stored over a 12 period timeline within a filterable database to assist with future purchasing decisions.

Input Products and quantities to generate a forecasting report.

Overview

In the *Overview* section, choose the *Location* and *Year*, then choose **Apply**.

Overview

Enter *Location* and *Year*

Location: Year: [Apply](#)

Products

In the *Products* section, search for and add Products for the report by selecting **Search Products**. A *grid* of Products display. Use the checkboxes to indicate which Products to include.

Use the **Filters** button below the **X** to search within a specific *Location/Department*. The button next to the **Filters** button can be selected to show which Products have been checked. The number on this button indicates how many Products are currently selected.

| <input type="checkbox"/> | ESN_Urea | DFrt00 | Dry Fert -00 | Tons | 590.000 |
| <input checked="" type="checkbox"/> | Dap | DFrt00 | Dry Fert -00 | Lbs | 465577.340 |
| <input type="checkbox"/> | BlendedDry | DFrt00 | Dry Fert -00 | Lbs | 5500.000 |

Items per page: [Save & Close](#)

Once Products have been checked, select the **X** to close the window.

In the *Products* grid that displays, enter the *Quantity* (quantities expected to be sold) for each month. To remove a

Product from this grid, choose the **Delete** icon. **Clear Row** can be selected to zero out each month for that Product. As *Quantities* are entered, the *Sum of Months* column updates with a running balance.

Use the filters above the grid to show only those from certain *Departments*, in specific *Classifications*, with certain *Active Ingredients*, or from a specific *Manufacturer*.
