Iowa Indemnity Assessment Setup - Grain STLM

Last Modified on 11/24/2026 1:12 pm CST

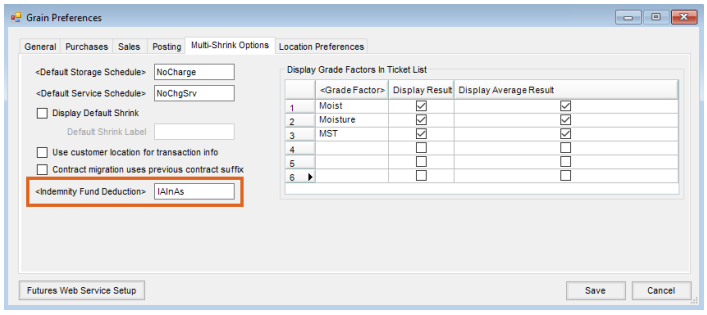

STLM

Follow the steps below to set up the Iowa Indemnity Assessment to be in compliance with Iowa Code 203D. This setup will give the ability to automatically apply a Settlement Deduction only to bushels that have been produced in IA, delivered to a Company with an IA Grain Dealers license, and purchased on a cash basis.

1. Add a Settlement Deduction at *Grain / Setup / Settlement Deduction* for the Indemnity Assessment. Enter the *Rate/Unit* of the assessment.

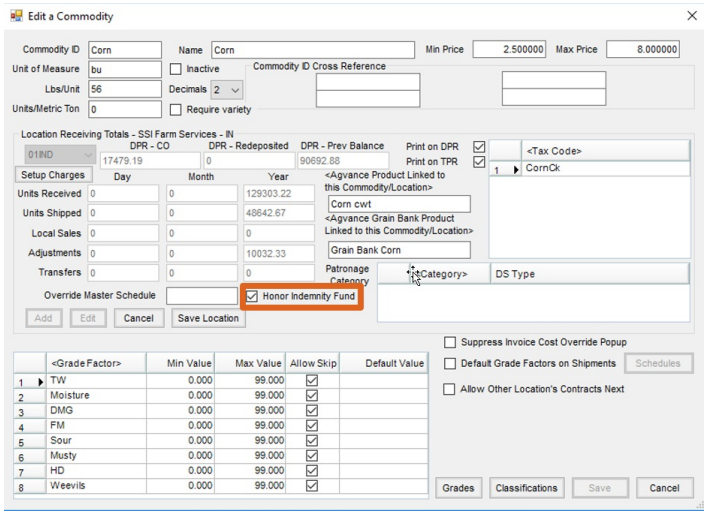

2. Select the new Settlement Deduction at *Grain / Setup / Preferences / Multi-Shrink Options* tab that will be used for the Indemnity Assessment.

3. Edit the Commodity at *Grain / Setup / Commodity* and check the *Honor Indemnity Fund* box for each Location

that grain delivered will be assessed.

4. If the Customer qualifies to be exempt from Indemnity Fund Assessment, edit the Customer, and on the *Grain Information* tab, check the *Exempt From Indemnity Fund Assessment* box.
