

API 7.0.26660 | 11.05.2024

Last Modified on 11/06/2024 9:18 am CST

- **FTM-4097 / Automated Blenders Blend Ticket Filtering** – New filters were added to the API method Get BlendTicket/GetBlendTicketData to help narrow down the list of Blend Tickets returned. Filter for loaded, voided, invoiced, dry/liquid, Automated Blender Type, and VRT tickets (in conjunction with other filters). All filters can be entered as true/false except for the *Automated Blender Type* filter, which has an enumeration to filter for a specific Automated Blender Type.
