Supplier eLink EDN Import

Last Modified on 08/26/2025 11:29 am CDT

Supplier eLink provides the ability to import supplier's Electronic Delivery Notices (EDN) for seed, and in some cases seed and crop protection. Those EDNs can then be imported into a Purchase Receipt in Agvance.

B2B login information, found at *B2B Setup / Setup / Electronic Delivery Notifications (EDN)*, is required for each Vendor utilizing the EDN web services. Setup information specific to individual Vendors can be found on the tabs below.

Bayer CropScience

Seed EDNs Only

🖷 S	🗟 Setup EDN X												
	<vendor></vendor>	Web Service URL	<logins></logins>	Version	sion UOM Conv.		Wsdl Version	Vendor Attribute		Supplier Name	Use Alt. Location Code	1	
1	Bayer Crop Science	Mass Revolution PC const 4P robust	******	5.0	(None)	\sim	5.0	AGIIS-EBID	\sim	Bayer CropS

											Save Cancel		

- 1. Within B2B Setup, navigate to Setup / Electronic Delivery Notification (EDN).
- 2. In the *Select EDN* window, double-click the *Vendor* heading to choose the appropriate Vendor and select **Done**.
- 3. In the URL column, enter the following:
 - https://ewsprd.us.f4f.com/F4FInbound
- 4. Double-click in the *Logins* column to select the *Agv*. *User* and enter the login information for each User accessing the EDN web services.
- 5. Enter 5.0 in the Version and Wsdl Version columns.
- 6. Choose the UOM conversion from the UOM Conv. drop-down. If not using UOM conversions, select None.
- 7. From the Vendor Attribute drop-down, select AGIIS-EBID.
- 8. Optionally, enter the name of the supplier in the Supplier Name column.
- 9. If utilizing the Alternate Location Codes set up at B2B / Setup / E-Business / Locations, select the Use Alt. Location Code checkbox.
- 10. Select Save.

- 9. If utilizing the Alternate Location Codes set up at B2B / Setup / E-Business / Locations, select the Use Alt. Location Code checkbox.

10. Select Save.

If Winfield has an agreement with the company to store product for them, Winfield can send EDNs specifically to create Intercompany Transfers in Agvance. This must be coordinated with Winfield to turn this messaging on for the Customer.

Once turned on by Winfield, when a *SalesOrderReference* in the EDN xml contains *S6*, the EDN will be available to pull into the *Intercompany Transfer* window when a Vendor set up for EDNs is selected on the ICT and when a TO Location is selected that has a matching Location GLN of the EDN. All other EDNs containing anything other than *S6* in the *SalesOrderReference* field will be available to be pulled into a Purchase Receipt as they normally would.

This currently uses the same EDN setup for Winfield EDNs at *Setup / Electronic Delivery Notification (EDN)* and the same URL.
