Mapping December 2024

Version 4.24

Web

- **HW-11269, 11330 / Field Reference List for Report Books** – The Field Reference List has been enabled as an option in Report Books.

- **HW-11521 / Recs Equipment Option** – A new *Equipment* section has been added below the *People* section of the *General* tab for all four Rec types. This section supports adding and deleting multiple Equipment entries from the Rec and has the *Find Equipment* auto-complete input similar to Events. Details are displayed for the added Equipment when hovering that include the *Parent Equipment Type*, *Equipment Type*, *Equipment Name*, *Owner/Operator*, and *Monitor ID*.

- **HW-11551 / Import Coverage Events Surfacing** – Performance improvements were made for coverage Events (Application, Harvest, Planting, and EC Data) to greatly improve the performance and speed (especially on Fields over 200 acres in size).

- **HW-11564 / Data Exchange Onsite Climate Connection** – With the Onsite Climate Connection, the Data Exchange no longer requests the same files redundantly within a short timeframe.

- **HW-11622 / Import Boundary Larger Uploads** – Large Field Boundary imports work as expected.

- **HW-11643 / Import Events Files Info Season Change** – For all Imported Events, changing the Season updates all Features/Points for that Season as expected.

- **HW-11665 / Layers Reports Print Layer** – The Print Layer and Split Screen Compare Print report will support the first soil sampling depth for surfacing, labels, and the results average table pending ongoing development.

- **HW-11693 / Import Planting** – Importing Planting when merging with an existing Event works as expected.

- **HW-11694 / Reports Merge Selected** – The *Merge Selected* reports feature works as expected.

- **HW-11700 / Import Events Fields** – The *Event Import* wizard and **Save** function work as expected.

Mobile

- **HW-9816 / Sampling Grid Point Placement** – The grid point placement on multipart Fields works as expected.

- **HW-11602 / Sampling Event IDs** – Improvements have been made to reduce the number of Event IDs per User guid/device.

- **HW-11603 / Field Label Overlap** – Scale-dependent label placement and removal was implemented when zooming in and out.

- **HW-11756 / RTK Field Boundaries** – Editing RTK Field boundaries works as expected.
