## Field Classifications - SKY Mapping

Last Modified on 12/16/2024 10:21 am CST

Field Classifications give the ability to group Fields with a unique name. Classifications can then be used in SKY Mapping as a filtering tool in the *Fields* panel and in reports.

Field **Classifications** are set up in Agvance at *Hub / Setup / Company Preferences*. On the *Field* tab, select **Field Classifications**.

🖳 Preferen	ces										
General	Field	Customer	Product	Farm	Grain Scale Inte	rface	API				
🖳 Field C	lassifica	tion Setup					Edit	Field Classi	fication	×	]

U War	n if cust	om applied is licator licens			n an applicator or d tickets	v Ig					
<field cla<="" th=""><td>ssificati</td><td>on Within 50</td><td>0 Ft of Sch</td><td>00 &gt;</td><td></td><td></td><td></td><td></td><td>Save Cance</td><td><u>اا</u> </td><td></td></field>	ssificati	on Within 50	0 Ft of Sch	00 >					Save Cance	<u>اا</u> 	
AGIIS S	etup	KwikTa	ag Setup						Print	:	Save Cancel

After adding the desired Classifications, go to SKY Mapping and navigate to the Field where the new Field Classification should be applied. Select the Ellipsis to the right of the Field name and choose Edit Field. SKY Mapping will zoom to the Field location and display the General Information panel.

Choose the *Classification* from the drop-down, then select **Save**.
