

# Energy December 2024

Last Modified on 12/31/2024 2:42 pm CST

- **SKYR-610 / Tank History Tab** – A *Tank History* tab has been added to the *Tank Information* page. View that particular tank's Product Delivery Order history including the *Ticket Number, Call In Date, Due Date, Status, Order Type, Route* detail and *Region*. The most recent 10 will load initially with the option to view more and filter down within the grid.
- **SKYR-626 / Tank List Load and Search/Filter** – For larger tank lists, initial view of the *Tanks* page was not populating a list until a search was conducted. The first 500 tanks will now load by default, allowing users to see data right away in the grid.

**Note:** Search actions will search the entire database of tanks. However, filtering and sorting the grid will only filter and sort the grid data which may not be the entire database of tanks. For example, the initial load instance would filter and sort the 500 tanks only until a Search is conducted to further refine the results. Searching does search across all grid inputs.

- **SKYR-632 / Logo on Daily Fuel** – The logo is no longer visible on the *Daily Fuel* page to make room for future additions.
