

Electronic Price Sheet Import

Last Modified on 01/08/2025 10:10 am CST

The Electronic Price Sheet Import allows the supplier's available pricing information to be imported for the current season by *Vendor*, *Price Zone*, and *Product Crop Code*. Additionally, the *Location* may be selected, as well as which *Price Level* to update. Currently Bayer, Winfield, and Corteva offer importing prices electronically.

The screenshot shows a window titled "Electronic Price Sheet" with the following fields and controls:

- <Vendor>: Bayer (text input), Bayer Crop Science (text input)
- Price Zone: (empty text input)
- Product Crop Code: (empty text input)
- Request Date: (date picker)
- Location: BYR (dropdown), Bakersfield (text input)
- Price Level: List Price (dropdown)
- Update master product location instead of selected
- Buttons: Get Prices, Cancel

1. Within Agvance, navigate to *Accounting / Transfers / Import* and select *Electronic Price Sheet*. Choose the appropriate *Vendor*.

2. If not already selected, in the drop-down, choose *Price*.

3. Enter the *Price Zone* and *Product Crop Code* to update in the corresponding fields.

Note: The supplier provides a list of their *Price Zones* and *Product Crop Codes*.

4. Enter the *Request Date* and select the *Location* of prices to update, and the *Price Level* to which the prices will be imported. Optionally, select the checkbox to *Update the master product location instead of the selected* location. Select **Get Prices**.

5. The *Electronic Price Sheet Details* window displays with results displayed in two grids.

- **Products Found** – This grid displays Products in Agvance with a matching GTIN in the supplier's system.
- **Product Not Found** – This grid displays Products in the supplier's system that were not found in Agvance. To bring a Product in this grid into Agvance, copy the GTIN into [Agvance Data Link](#), link the Product, and return to this window to update pricing.
