Last Modified on 05/08/2026 12:19 pm CDT

Plans are found under *Agronomy* in SKY Order and are displayed in a grid that operates much like an Excel spreadsheet. For more information on how the grid functions, see [Using Grids in Agvance SKY](#). Select a *Plan Name* to view the Plan as information only.

- **Visible in G360** – Select the current label to show or hide the Plan in Grower360.

If using a Template that is company-wide and has Products from a Location other than the Ticket Location, SKY Order will find the matching Product(s) for the Location where the Template is being applied using the Product ID and Inventory Department Category.

Scenario 1: All Products Have One Exact Match

- All Products on the Template have one exact match.
- No dialog will display, and the Products will be added to the Blend.

Scenario 2: No Matching Products

- A window will display indicating there are no matching Products.
- Close/cancel this dialog. The Template will be removed from the Blend (no Products will be added/removed).

Scenario 3: Multiple Matching Products

- A window will display giving the ability to choose the correct Inventory Department from where the Product should be pulled.

Scenario 4: Combination of Scenarios 1-3

- In this scenario, there are Products with no match and Products with multiple matches. Products with an exact match will be added to the Blend automatically and will not be included on the dialog. The *Acknowledge and Continue* checkbox must be selected before selecting **Replace Products** and will remove that Product from the order.
