Agvance Ops Overview

Last Modified on 07/08/2026 3:53 pm CDT

Agvance Ops provides Applicators and Drivers an optimized view of job assignments. Data is synced allowing Applicators to update their job status in real-time, start, edit, and complete Blend and Delivery Tickets, and access Customer contact information from any Android or iOS device.

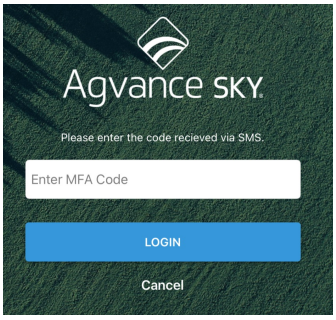

Download the App

Search for *Agvance Ops* and download from either Google Play (Android) or the iTunes App store (iOS).

- **iOS (iPhone & iPad):** Download from the App Store
- **Android (Phones & Tablets):** Download from Google Play

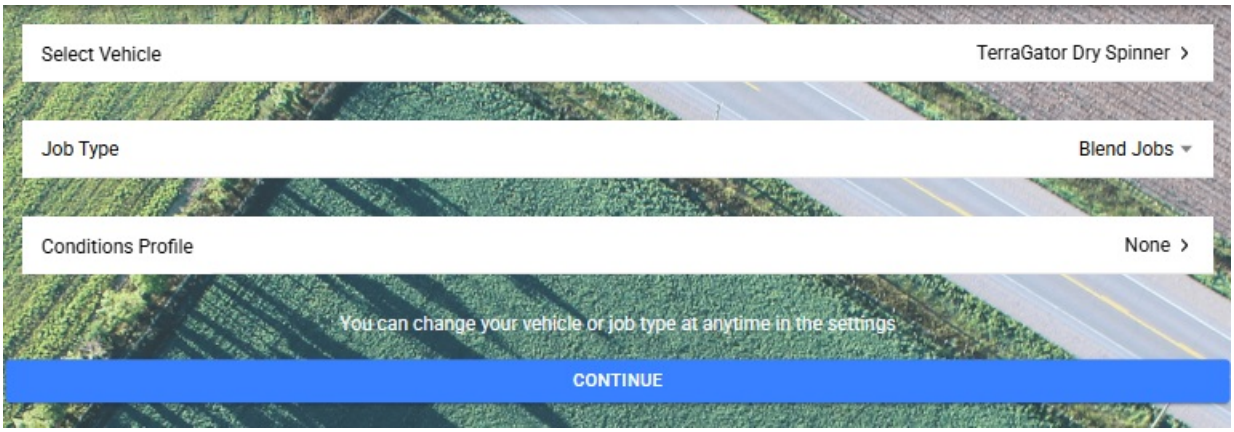

Multi-Factor Authentication

If Multi-Factor Authentication is enabled in Agvance SKY, the following screen will display upon signing into Agvance Ops. Enter the code received either via text or authenticator app. See here for more information on Multi-Factor Authentication.

Sign In

Select the *Vehicle* being used that day. Once selected, tapping **Continue** opens the list of Blend Tickets or Delivery Jobs assigned.

Note: Only *Job Type* options that have been set up for the Agvance SKY User can be selected.
