

Opening Agvance Ops

Last Modified on 03/28/2025 12:00 pm CDT

Agvance Ops provides Applicators and Drivers an optimized view of job assignments. Data is synced allowing Applicators to update their job status in real-time, start, edit, and complete Blend and Delivery Tickets, and access Customer contact information from any Android or iOS device.

Select the vehicle being used that day. Once selected, tapping **Continue** opens the list of Blend Tickets or Delivery Jobs assigned.
