

# Agvance Ops Overview

Last Modified on 03/31/2026 2:06 pm CDT

Agvance Ops provides Applicators and Drivers an optimized view of job assignments. Data is synced allowing Applicators to update their job status in real-time, start, edit, and complete Blend and Delivery Tickets, and access Customer contact information from any Android or iOS device.

## Download the App

Search for *Agvance Ops* and download from either Google Play (Android) or the iTunes App store (iOS).

- iOS (iPhone & iPad): [Download from the App Store](#)

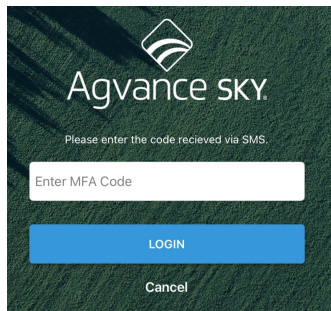

- Android (Phones & Tablets): [Download from Google Play](#)

## Multi-Factor Authentication

If Multi-Factor Authentication is enabled in SKY, the following screen will display upon signing into Agvance Ops. Enter the code received either via text or authenticator app. See [here](#) for more information on Multi-Factor Authentication.

## Sign In

Select the Vehicle being used that day. Once selected, tapping **Continue** opens the list of Blend Tickets or Delivery Jobs assigned.

The image shows a settings interface with three dropdown menus stacked vertically. The background is an aerial view of a green field with a road. The first dropdown is labeled 'Select Vehicle' and shows 'TerraGator Dry Spinner >'. The second is labeled 'Job Type' and shows 'Blend Jobs ▾'. The third is labeled 'Conditions Profile' and shows 'None >'. Below the dropdowns is a blue bar with the text 'CONTINUE' in white. A message in the center of the screen reads 'You can change your vehicle or job type at anytime in the settings'.

Select Vehicle TerraGator Dry Spinner >

Job Type Blend Jobs ▾

Conditions Profile None >

You can change your vehicle or job type at anytime in the settings

CONTINUE

**Note:** Only Job Type options that have been set up for the SKY User can be selected.
