

# Delivery Jobs - Agvance Ops

Last Modified on 02/04/2026 3:16 pm CST

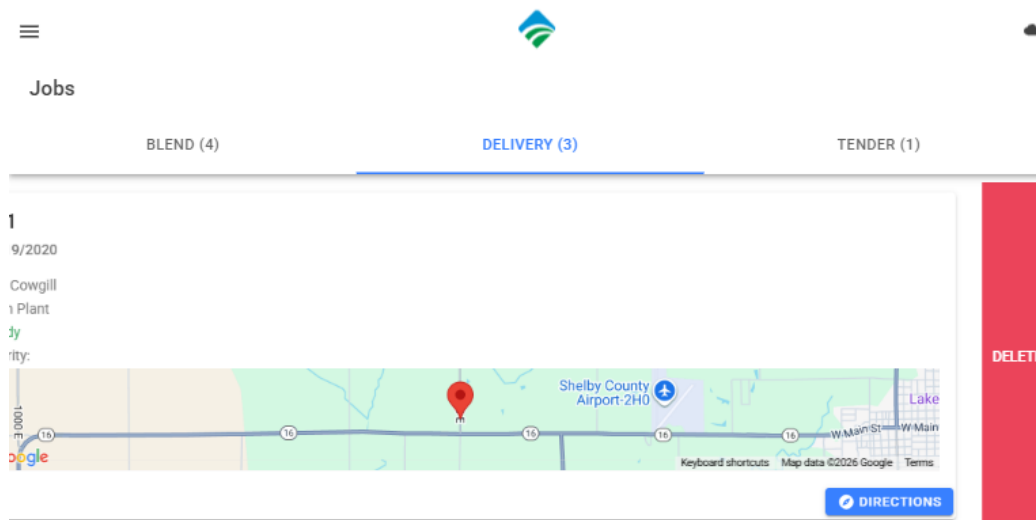

Delivery Jobs in Agvance Ops allow drivers to view, manage, and complete dispatched delivery assignments directly from the mobile app. Drivers can access job details, view maps and directions, manage products, communicate with dispatch, and update job status as deliveries are started and completed.

## Delivery Jobs

To switch between job types, select the Blend Jobs or Delivery Jobs tab at the top of the screen. Tabs will only display if the user is set up for those specific job types.

On any job, swipe from right to left to **Delete** to remove the job from the Driver's device. Select a job for more details and options related to that specific job. Tap **Directions** to get directions to the job's location.

## Overview

The Overview tab displays basic information for the delivery including *Customer Name*, *Contacts*, and a map image of the Field Location. Tap **Refresh** in the upper right to reload the job from Agvance. Once a job has been started, the Photo icon can be selected to add photos by opening the camera or by selecting from existing photos.

Swipe the top half of the screen from left to right for more details regarding the selected Delivery Ticket.

## Map

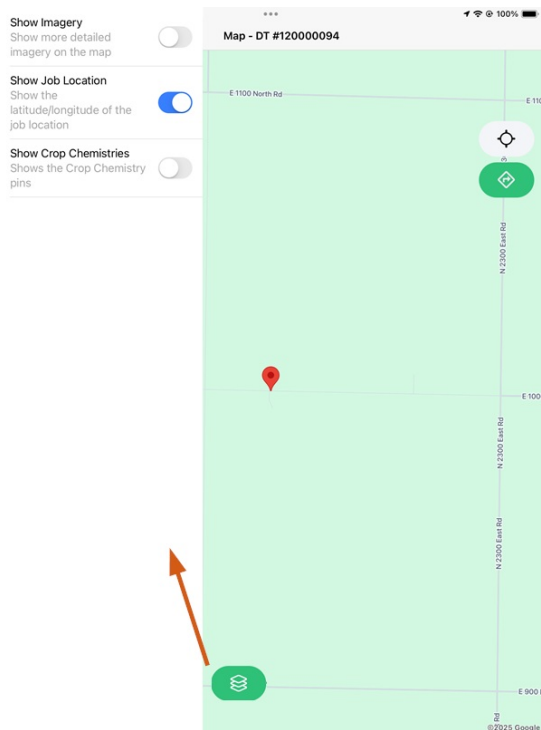

On the lower half of the screen, a map of the job displays. The number of acres can be adjusted if necessary.

Start Job

Complete Job

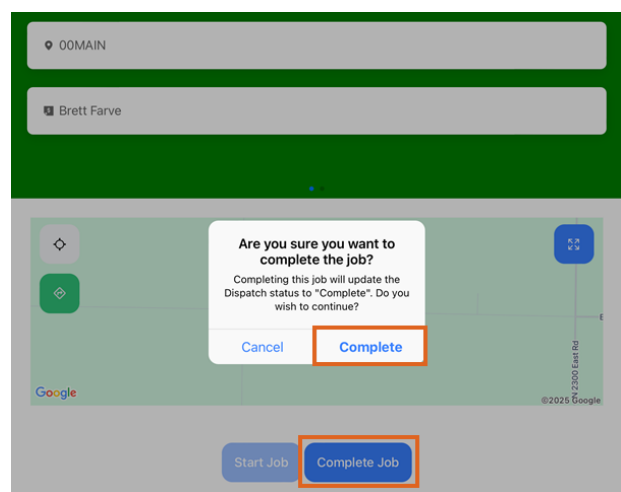

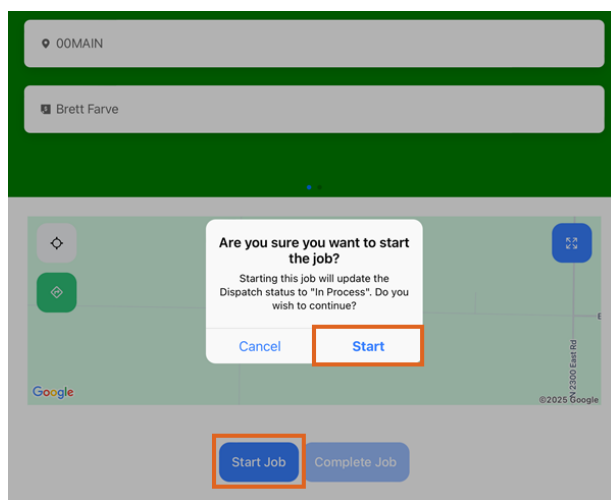

1. Select the **Compass** icon to zoom to the current location on the map.
2. Tap the **Directions** icon to open an independent app with directions to the Field Location.
3. Select the **Full View Map** icon to open a full view of the satellite map.

- The **Compass** and **Directions** icons are available here as well.
- The **Layers** icon opens options on the left side of the screen to indicate what should and should not be shown on the map.

## Start/Complete Job

Tapping **Start Job** communicates to SKY Dispatch the job has been started. When the job is completed, selecting **Complete Job** communicates the status to SKY Dispatch and optionally marks the ticket as *Loaded* in preparation for invoicing.

## Products

The *Products* tab displays detailed information for the Product being delivered.

Overview

Products

Messages

1. Search for and select additional Products by choosing the blue+ icon.
2. Select the Product to view additional details.
3. The *Ship From Location* and *Total Inventory Quantity* can be adjusted here.

## Messages

The *Messages* tab gives the ability to communicate with Dispatchers in SKY Dispatch. Choose a Dispatcher and enter the message. Selecting the **Paper Clip** icon gives the ability to add an attachment and displays a prompt to select a file or image from Storage or Photos. Tap the **Arrow** to send.
