STLM Mass Edit Grade Factor Values

Last Modified on 08/04/2025 10:41 am CDT

Edit Grade Factor values for selected Scale Tickets.

1. Navigate to *Grain / Utilities / Mass Edit / Grade Factor Values*.
2. Select one or multiple Scale Tickets, then choose **Done**.
3. On the *Mass Edit Grade Factor Values* window, Scale Ticket information can be reviewed and the original ticket can be displayed by selecting **View**.
4. Highlight a row and choose **Load Information** (only one row can be loaded at a time). Grade Factors will then be listed along with additional information in the grid at the bottom of the window.
5. In this grid, the *New Average Grade Factor Value*, *New Prem/Disc Value*, and *Premium/Discount Schedule* can be edited by modifying the field and checking the *Update* column for the respective field.
   Note: If the *Use Average When Present* option is enabled on Dock, Shrink, or Premium/Discount tables, this utility will update the *Average Result* on the Grade Factor. The *Average Result* can only be set/changed using this utility.
6. When finished, select **Save**.
