

# SKY Mapping Mobile App Webinar | 09.03.2025

Last Modified on 08/05/2025 10:40 am CDT

## Mapping Field Boundaries, Soil Sampling, & Measuring Features Using the SKY Mapping Mobile App

September 03, 2025 | 10am - 10:45am CT

Get ready for automated measurements, boundary mapping, and soil sampling with the SKY Mapping Mobile App! This webinar will teach you how to use the tracking feature to accurately measure in-field features, construct field boundaries, and manage soil sampling strategies. We will have a refresher and cover the latest features on the trusted components of the Mapping Mobile App to enhance your daily workflow. Join Geospatial Scientist and Data Analyst Steven Di Naso, and Agronomy Customer Advocate Josh Marten, for this demonstration of the available technology and advancements in SKY Mobile.

After registering, you will receive a confirmation email containing information about joining the webinar.
