Agvance App Status

Learn about new or soon-to-be released Agvance apps and the sunsetting dates for apps that are ending.

New Apps: Agvance Ops and SKY Warehouse
Sunsetting Apps: Apply, Warehouse, and Contain
Updated App: Inform

- The new apps (Agvance Ops and SKY Warehouse) and the updated app (Inform) are available for download on Android and iOS devices today.
- Single Sign-On (SSO) is fully supported for the new apps.
- Apply, Warehouse, and Contain applications will not be available for download on newer Android and iOS devices and and have been removed from app stores.

SKY Warehouse App

The SKY Warehouse app is in app stores now and requires a SKY login. Your Sales Account Manager can assist with adding app user licenses.

Moving to the new SKY Warehouse app is essential for maintaining a secure, reliable, and future-ready platform. This new app replaces the Warehouse and Contain apps currently available in app stores.

It is essential to download and begin using the new SKY Warehouse app now. Due to app store restrictions, Warehouse and Contain apps may no longer be available for download on or after November 1st. All future updates and enhancements will be exclusively in the new SKY Warehouse app.

Agvance Ops Replaces the Apply App

- Agvance Ops is ready for Applicators and Delivery Drivers to use today! Download it from the app stores and use it in production.
- Agvance Ops replaces the Apply app, and all future functional changes will be made only in Agvance Ops.
- Agvance Ops includes highly desired features like Offline Mode and photos of delivery drops. For years, customers have been asking, and this platform change allows us to deliver this functionality.
  - **Offline Mode:** The cloud icon indicates when connectivity has been lost. Work can continue, and information can be saved locally and submitted back to Dispatch when the connection has been restored.
  - **Photos of Deliveries:** Take a picture of a delivery drop and include the photo in the grower notification.
- For now, users can switch back to Apply if they find Agvance Ops is missing a necessary feature/functionality. Please report any issue found in Agvance Ops to Customer Support who will pass this on to the Product Management team.

Inform App

The new Inform app version update is now available in the app stores!

All future functional changes will be made in the current Inform app, though it is important to ensure the app is operating on the latest update to verify it is accessing the latest Inform functionality.
