Containers - Agvance SKY Warehouse

Last Modified on 07/08/2026 4:08 pm CDT

The *Containers* page lists Containers added in Agvance Windows at *Hub / Setup / Refillable Container Management*. Use the *Search Containers* field to find specific Containers or the **Barcode** icon to scan the Container's barcode with the device's camera.

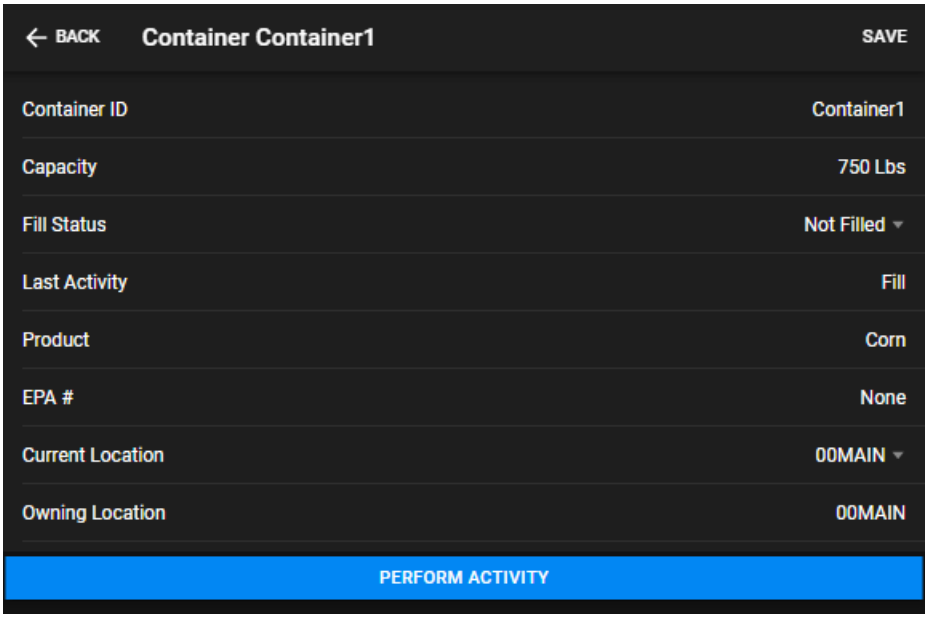

The list can be narrowed down by tapping the **Filters** icon. Filters include *Container Location*, *Filled Status*, *Include Containers With No Location*, and *Approved Product*.

Container Details

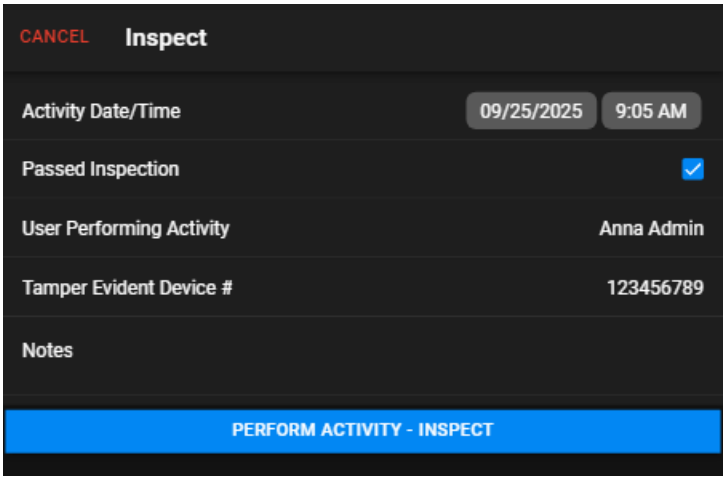

Select a Container by tapping the Container in the list (which can be narrowed down by searching for specific Containers) or by selecting the Barcode icon and scanning the Container's barcode. When using the Barcode feature for the first time, a message will display to allow access to the device's camera.

Selecting a Container provides additional Container details such as the *Container ID*, *Capacity*, and *Product*. Additionally, the *Fill Status* and *Current Location* can be modified from this screen. If changes are made, be sure to tap **Save** in the upper right.

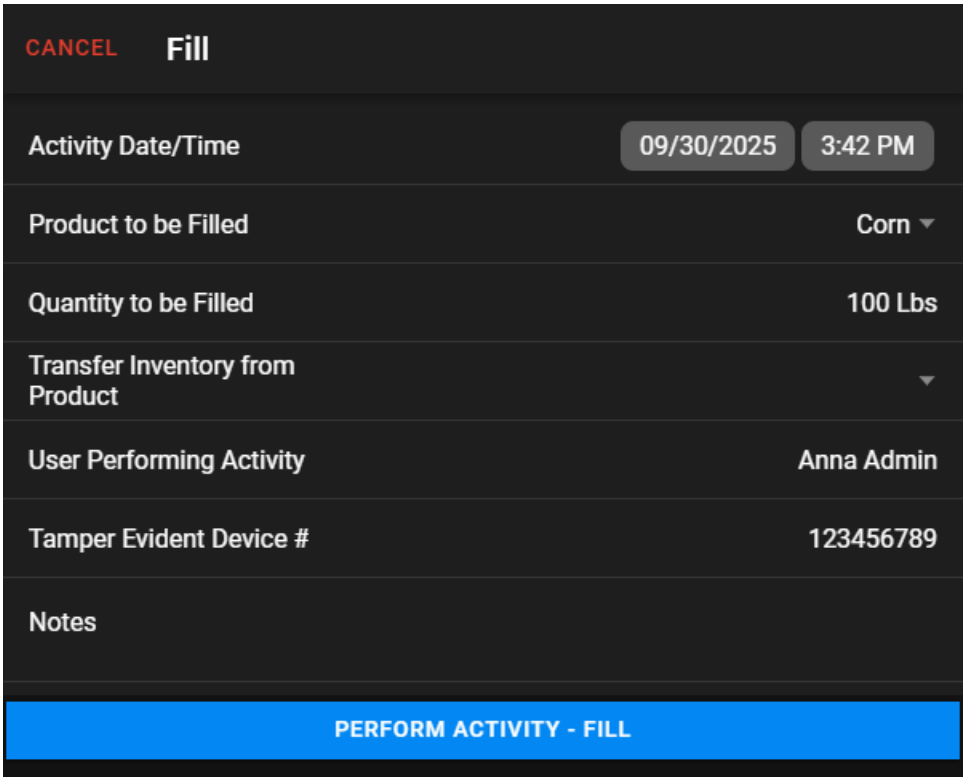

Choosing **Perform Activity** provides the following options:

Inspect

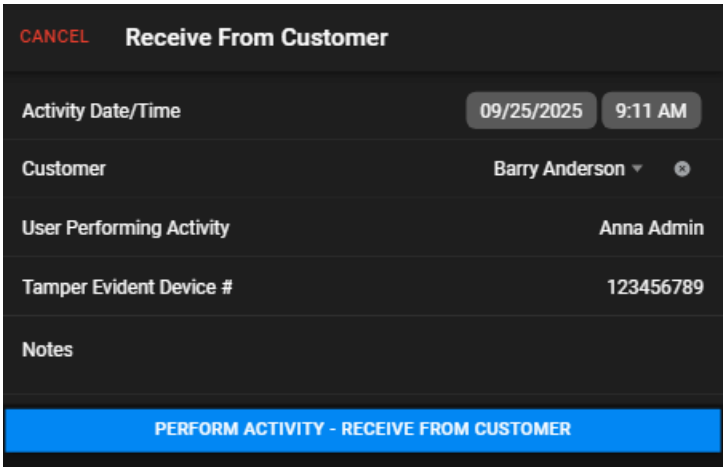

Fill

Choose the Product filling the Container. The *Container Products* tab displays Products the Container previously held. A Product can be selected from the *Transfer Inventory from Product* drop-down if applicable.

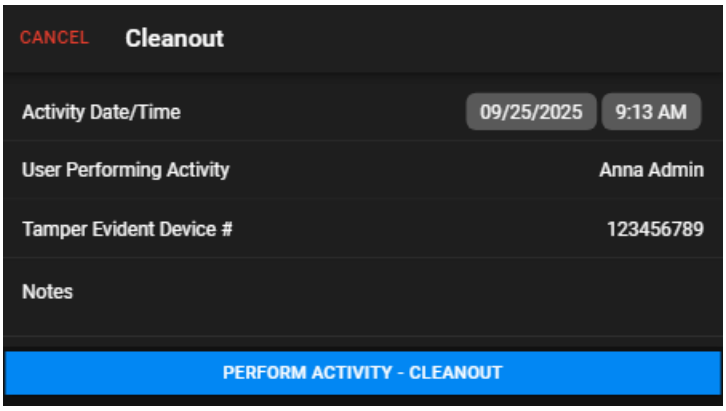

Receive From Customer

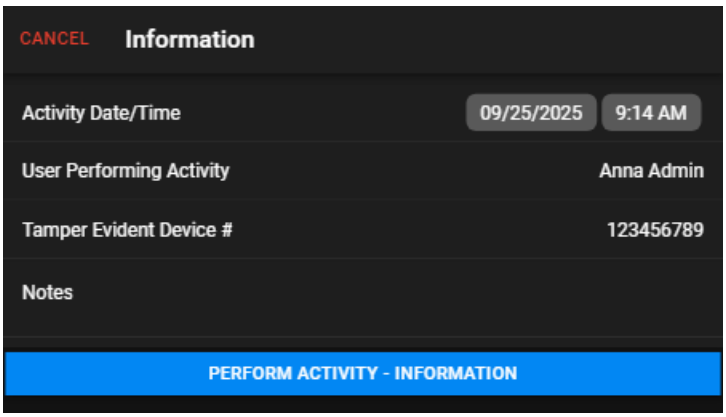

Select the Customer from the first window that displays. This Customer can be modified if needed.

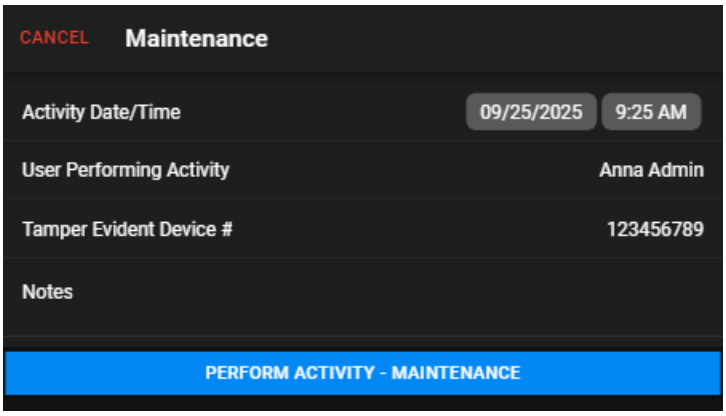

Cleanout

Information

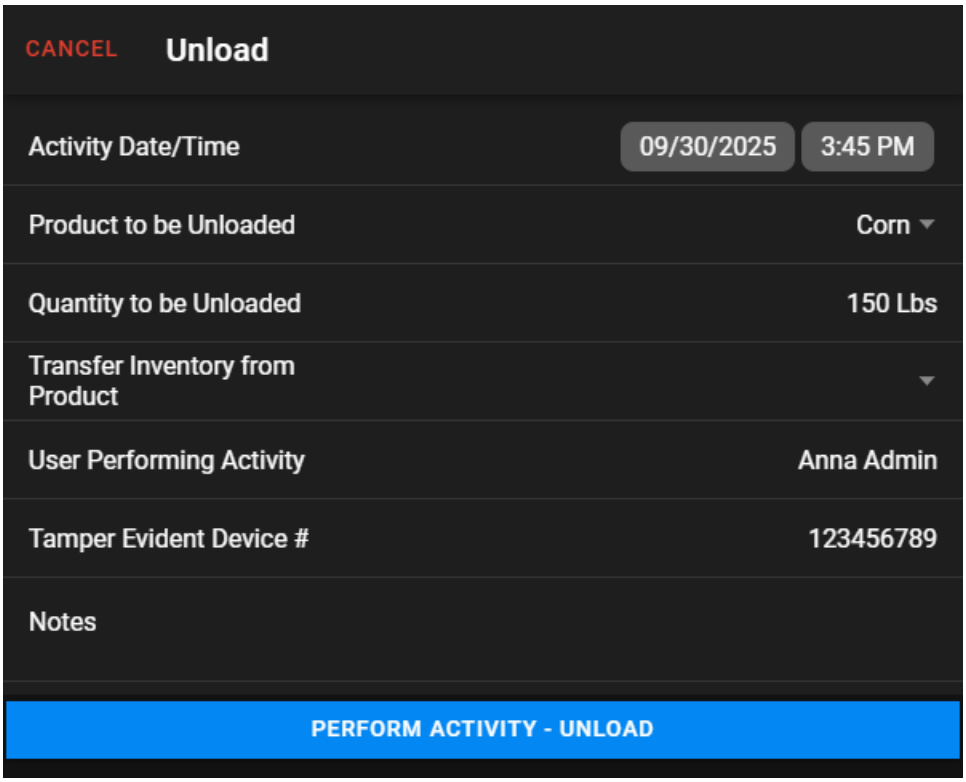

Maintenance

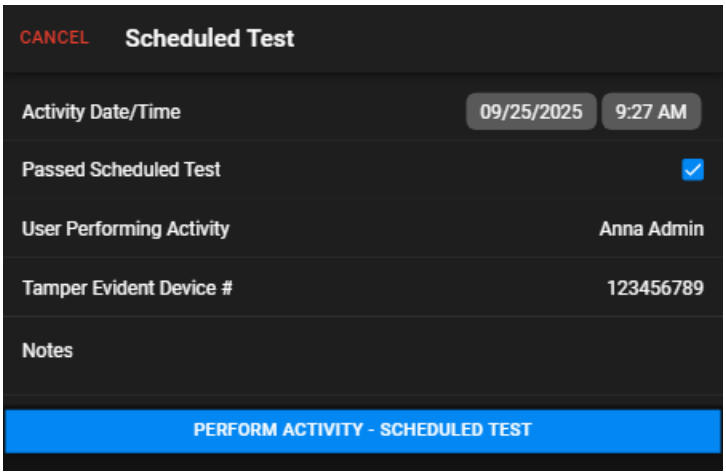

Unload

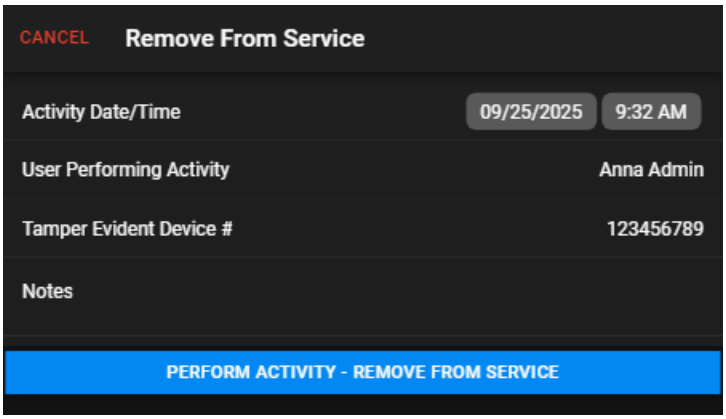

Choose the Product being unloaded from the Container. The *Container Products* tab displays Products the Container previously held. A Product can be selected from the *Transfer Inventory from Product* drop-down if applicable.
