

Containers - SKY Warehouse

Last Modified on 09/30/2025 3:48 pm CDT

The *Containers* page lists Containers added in Agvance at *Hub / Setup / Refillable Container Management*. Use the *Search Containers* field to find specific Containers or the **Barcode** icon to scan the Container's barcode with the device's camera.

The list can be narrowed down by tapping the **Filters** icon. Filters include *Container Location*, *Filled Status*, *Include Containers With No Location*, and *Approved Product*.

Container Details

Select a Container by tapping the Container in the list (which can be narrowed down by searching for specific Containers) or by selecting the Barcode icon and scanning the Container's barcode. When using the Barcode feature for the first time, a message will display to allow access to the device's camera.

Selecting a Container provides additional Container details such as the *Container ID*, *Capacity*, and *Product*. Additionally, the *Fill Status* and *Current Location* can be modified from this screen. If changes are made, be sure to tap **Save** in the upper right.
