September 2025 SKY Release Notes

Analytics

- **AN-3249 / Report Writer** – Report Writer in SKY Analytics gives the ability to create a custom report with a Primary and optional Secondary Table. This function must first be enabled in SKY Admin per User and will then be available in the left navigation. See **here** for more information.

Energy

- **SKYR-855 / Preview Driver Info on PDO** – If a driver is selected to receive notification of a PDO, choosing the **Preview Message** icon will open a Driver Email Preview.
- **SKYR-917 / Invoice Tab on Orders Page** – A new tab has been added to the *Orders* page for *Invoices* tied to a Product Delivery Order. **Read more here**.
- **SKYR-918 / Invoice Tab Links** – Links have been added to the grid at *SKY Energy / Orders / Invoice*. The *PDO Number* opens a new tab to view the related *Product Deliver Order* page. The *Tank Serial Number*, when selected, opens a new tab viewing the *Tank Info* page for that specific tank and the *Customer ID* opens the Customer in SKY Customer in a new tab.
- **SKYR-919 / Invoice Details** – In the *Invoice* grid, view more Invoice details by selecting the Invoice Number link on any row to view that Invoice's more detailed page view.
- **SKYR-941 / Attachments on Tank View** – **View** *Customer Attachments* link added to the *Tank Information* page in SKY Energy linking to the *Attachments* tab in SKY Customer.
- **SKYR-995 / Latitude/Longitude Tank Details** – Latitude (8 characters) and Longitude (9 characters) fields have been added for Tank location details when adding/editing a Tank.

Mapping

Version 5.18

Web

- **HW-8752 / Loadsheet Merge Files** – A text-only page was added to the Loadsheet report for Application Recs (Manual and Equation) when selecting the *Merge Files* option on a Controller File export or the *Multi-Field Rec* option on the Loadsheet report. This is available on the Controller export and as the standalone

Loadsheet report option.

- **HW-12206 / Searching** – Searching multiple times or having a Field chosen that does not match the search criteria then selecting the Customer context menu works as expected.
- **HW-12247 / Import Application Event** – Product Mix edits on imported Application Events with manure products work as expected.

Version 5.17

Web

- **HW-12104 / Soil Sample Results Report** – Nematode Sampling Event support was added to the Soil Sample Results report where each selected Event returns a Soil Sample report.
- **HW-12145 / Sampling Target Level Names** – Full customization of defined legends used for soil and tissue sampling is now allowed at the system level and all Org Levels below. Additionally, a Target Level Names section has been added tot he System Profile. The Edit window defaults to the current names used for both Soil and Tissue: *Very Low*, *Low*, *Medium*, *Optimal*, *Very High*, and *Toxic*. These can be updated to different names and impact everything using the name(s) unless overrides are in place at a lower Org Level. An optional section was also added to the Owner profile and all Location profiles called *Target Level Name Overrides*.
- **HW-12200 / Merge Events on Import** – The Harvest Event merge works as expected.

Mobile

- **HW-11876 / Starting Point Indicator** – The first vertex added is now a larger green pushpin for the *Track* option of a Field boundary polygon. This provides clear indication of where the GPS-tracked boundary was started.
- **HW-12137 / Transfer Boundary** – The Transfer Boundary Part tool works as expected.
- **HW-12140 / Light Theme** – The selected Event type panel is visible when using the Light theme in the mobile app.
